The Resource Management Program of the Maryland Department of the Environment produced this report. Contents may be used without permission, provided credit is given.

Overview

Introduction

The Maryland Department of the Environment (Department or MDE) respectfully submits to the Governor and General Assembly, MDE's Annual Report describing how solid waste was managed in Maryland during calendar year (CY) 2022. Beginning in 2009, the Maryland Waste Diversion Activities Report and Solid Waste Managed in Maryland Report were combined into one report. This report is submitted in accordance with Section 9-204(n) of the Environment Article, Annotated Code of Maryland, which requires MDE to prepare an annual report identifying the amount of solid waste, by weight or volume, disposed in the State during the previous year, and Section 9-1702(e), which requires MDE to prepare an annual report detailing recycling and waste diversion in Maryland.

Part I of the report addresses solid waste managed by permitted solid waste acceptance facilities and provides information regarding the management of solid waste, by weight or volume, which was captured by permitted solid waste acceptance facilities in the State during the previous calendar year. All permitted solid waste acceptance facilities must provide MDE with the information needed to prepare this report on an annual basis, including: municipal landfills; rubble (construction and demolition (C&D)) landfills; industrial waste landfills; land clearing debris (LCD) landfills; solid waste transfer stations; solid and medical waste processing facilities; solid waste processing facilities and transfer stations; municipal solid waste incinerator/waste-to-energy facilities; natural wood waste (NWW) recycling facilities; and composting facilities. The recycling data reported in Part I represents only the recycling activities conducted by permitted solid waste acceptance facilities.

Part II of the report addresses waste diversion (*i.e.*, recycling and source reduction) in Maryland and provides information on programs covered by Maryland's waste diversion legislation, including local jurisdiction recycling and source reduction (SR) data for CY22, and an overview of the State's technical assistance activities during Fiscal Year (FY) 2023. Data contained in Part II comes from annual reports submitted to MDE by Maryland's 24 counties, including Baltimore City, annual reports filed by Maryland permitted solid waste acceptance facilities, State government agencies participating in the All-State Agencies Recycle (All StAR) Program, and newspaper and telephone directory publishers. Maryland counties also provide MDE information on their collection programs, institutional recycling programs, public education efforts, source reduction activities, and disposal facilities.

Executive Summary

In CY22, Maryland counties, Baltimore City, and State Highway Administration generated 14,986,353 tons of solid waste (see Table 1 – Maryland Waste Generation Totals, including footnotes, for details). The total represents solid waste managed by all sources (permitted facilities, non-permitted facilities, recycling data, and materials sent directly out-of-State). This total is an increase of 7.6% from the 13,931,609 tons generated in CY21. The Maryland Recycling Act (MRA) outlines the types of waste that are credited toward a county's recycling rate. MRA waste

is equal to municipal solid waste (MSW) plus industrial waste from non-private, industrial waste landfills. MRA waste comprises 2,865,759 tons of MRA recyclables, and 4,508,325 tons of waste disposed (without recycled MSW ash and backend scrap metal), for a total of 7,374,084 tons of MRA waste generated in Maryland.

Table 1 – Maryland Waste Generation Totals

County	Total Waste (tons)
Allegany	557,242
Anne Arundel	1,110,554
Baltimore City	2,459,453
Baltimore County	1,652,285
Calvert	161,079
Carroll	866,031
Cecil	538,340
Charles	538,204
Dorchester	86,882
Frederick	453,135
Garrett	66,956
Harford	592,124
Howard	571,661
Mid-Shore *	394,251
Montgomery	1,543,717
Prince George's	2,101,418
Somerset	65,729
St. Mary's	114,725
Washington	239,582
Wicomico	333,258
Worcester	162,845
State Highways	376,882
MARYLAND TOTAL ^	14,986,353

* Mid-Shore Counties include Caroline, Kent, Queen Anne's, and Talbot.

^ Due to rounding the Maryland Total differs from the actual value of 14,986,352. Maryland counties total 14,609,470.

A total of 9,824,966 tons of waste was accepted at Maryland permitted solid waste acceptance facilities. Of that total, 9,390,338 tons were managed by Maryland permitted solid waste acceptance facilities during CY22 by recycling, disposal (incineration and landfilling), or transportation out-of-State (see Table 3). Table 2 details the difference between the amounts of waste generated in Maryland, highlighted in green, and the waste managed by Maryland permitted solid waste acceptance facilities, highlighted in blue and yellow. Table 3 details the waste managed by Maryland permitted solid waste acceptance facilities.

Table 2 – Waste Generated in Maryland vs. Waste Managed by Maryland Permitted Solid Waste Acceptance and Recycling Facilities

Waste Detail		Tons
A	Total Waste Generated in Maryland (see Table 1, including “^” footer)	14,986,353
B	Total Maryland Waste Recycled (see Table 17, including “*” footer)	8,454,261
C	Total Maryland Waste Disposed (A – B)	6,532,092
D	Total Maryland waste recycled that was not managed through a Maryland permitted Solid Waste Acceptance Facility (8,454,261 (Table 17) – 1,466,071 (Table 3))	6,988,190
E ^	Total waste disposed by Maryland counties, but not captured by a Maryland permitted solid waste acceptance facility	113,434
F	Total waste imported into Maryland (see Table 14)	410,701
G *	Adjustment	1,094,908
Total Waste Managed by Maryland permitted solid waste acceptance facilities (A-D-E+F+G (see Table 3))		9,390,338

Waste generated in Maryland	Waste generated vs. managed adjustments	Waste managed by Maryland Permitted Solid Waste Acceptance Facilities
-----------------------------	---	---

[^] The amount of waste sent directly out of State by Maryland counties, bypassing Maryland permitted facilities. It is not reported separately in this report. However, it is generated in Maryland and included in the 14,986,353 waste generated tons.

*

Adjustments to avoid double-counting and accurately report the amount of waste that is managed, but not generated in Maryland. Adjustments made to account for waste being sent from 1 permitted facility to another, to account for incinerator ash & byproducts, recycling at permitted facilities but not captured by the county’s MRA reporting, and state highway recycling.

Maryland achieved a 43.1% MRA waste diversion rate. This consisted of a 38.9% MRA recycling rate plus a 4.2% (327,269 tons reduced) source reduction credit. An additional 5,588,503 tons of materials (e.g., scrap metal, asphalt, soils, etc.) that do not count toward the MRA recycling rate were also recycled for a grand total of 8,454,261 tons recycled in Maryland. (See Tables 17, 18, and 19, including footnotes, for details.)

Other highlights for CY22:

- * 3,220,376 tons (35%) of the waste managed by Maryland permitted solid waste acceptance facilities was landfilled in Maryland;
- * 1,629,941 tons (17%) were recycled/reused in Maryland;
- * 1,110,006 tons (14%) were incinerated in Maryland; and
- * 2,654,353 tons (25%) were exported to out-of-State facilities. (See Table 15, including footnotes, for details.)
- * Maryland remains a significant exporter of solid waste and exports more waste than it imports. A total of 2,654,353 tons of waste was exported from Maryland, while only 410,701 tons of waste was imported into Maryland. (See Tables 14 and 15, including footnotes, for details.)
- * Maryland MSW landfills reported a total available capacity of 49,222,941 tons in CY22. That is a increase of 0.76% from the 48,853,125 tons in CY21. (See Appendix C, including footnotes, for details.)

Part I – Waste Management by Permitted Solid Waste Acceptance Facilities

Introduction

Part I of the report addresses waste managed by Maryland permitted solid waste acceptance facilities. In accordance with Section 9-204(n) of the Environment Article, Annotated Code of Maryland, State permitted solid waste acceptance facilities must provide MDE with the information needed to prepare an annual report detailing the amount of solid waste they manage.

The annual report must identify:

- * The amount of solid waste managed in each of the following categories:
 - MSW;
 - C&D;
 - LCD;
 - Industrial Waste;
 - Incinerator Ash;
 - NWW; and
 - Any other solid waste identified by MDE.
- * The amount of solid waste managed in the State that is generated outside the State.
- * The counties where the solid waste originated.
- * The amount of solid waste generated in the State that is transported outside the State for disposal.
- * An estimate of the amount of solid waste managed or disposed by:
 - Recycling;
 - Composting;
 - Landfilling; and
 - Incineration.

In addition to the mandatory information above, permitted solid waste acceptance facilities may submit optional information related to the economic benefits provided by those facilities to the community. Such information may include:

- * An accounting of the facility's economic benefits provided to the locality where the facility is located;
- * The value of disposal and recycling services provided to the locality at no cost or reduced cost;
- * Direct employment associated with the facility; and
- * Other economic benefits resulting from the facility during the preceding calendar year.

Solid Waste Disposal Data

To collect the information necessary to comply with the reporting requirements of Section 9-204(n) of the Environment Article, Annotated Code of Maryland, MDE has reviewed and compiled the data reported in the Annual Tonnage Reports

submitted by permitted solid waste acceptance facilities that accepted solid waste in CY22. A solid waste acceptance facility is any landfill, incinerator, transfer station, or processing facility whose primary purpose is to dispose of, treat, or process solid waste. The reports are required as a condition of each facility's Refuse Disposal Permit and describe each facility's solid waste management activities for the preceding year. Appendix A provides a summary of the information that MDE received from the facilities that voluntarily chose to report economic benefits in the Annual Tonnage Report.

Recycling Data

To compile the required data summarizing recycling activities during CY22, MDE reviewed and analyzed the information contained in the Annual Tonnage Reports from permitted solid waste acceptance facilities. The recycling data reported in Part I represents only the recycling activities conducted by the permitted solid waste acceptance facilities. Statewide recycling information is available in Part II, "Waste Diversion," of this report.

Solid Waste Management by Permitted Solid Waste Acceptance and Recycling Facilities in CY22

In CY22, 9,824,966 tons of solid waste was accepted by Maryland permitted solid waste acceptance facilities, NWW recycling facilities, and composting facilities. The 9,824,966 tons includes waste stored on site and waste sent from one facility to another. Of the 9,824,966 tons accepted, 9,390,338 tons were managed by storing, recycling and disposal in Maryland, or transportation out of State.

The amount of out-of-State waste that was managed in Maryland in CY22 increased to 410,701 tons, compared to 327,909 tons in 2021. The quantity of solid waste accepted, processed, and disposed at the permitted refuse disposal systems in Maryland is like previous years. 3,220,376 tons of waste was landfilled, and 1,110,006 tons was incinerated in Maryland. 1,629,941 tons of reclaimed recyclables were collected, sorted, and transferred to recycling facilities in Maryland. Figure 1 depicts the millions of tons of waste managed by Maryland permitted facilities in previous years.

The use of out-of-State facilities for the disposal of Maryland generated waste continued in CY22. There was an increase, to 2,654,353 tons, in the amount of waste exported compared to CY21 (2,315,499 tons).

Figure 1 - Waste Managed by Maryland Permitted Facilities

Table 3 details the total amount of solid waste that Maryland permitted solid waste acceptance facilities stored on site or managed via export, disposal (*i.e.*, landfilling and incineration), and recycling/reuse. Permitted solid waste acceptance facilities do not report the types of MSW collected, only total MSW. According to the Maryland’s 2016 Maryland Statewide Waste Characterization Study, MSW disposed in Maryland is comprised of approximately 25.6% paper and paperboard, 17.9% food scraps, 6.1% yard trimmings, 14% plastics, 3.9% metals, 2.3% glass, 15.3% C&D, 0.4% household hazardous waste (HHW), 0.5% electronics, 5.7% textiles, and 8.2% other (*e.g.*, diapers, bulky items, tires).

Table 3 – Waste Managed in CY22 by Maryland Permitted Solid Waste Acceptance and Recycling Facilities

Solid Waste Category	Tons Accepted ¹	Tons Recycled/ Reused ²	Tons Composted	Tons Disposed	Tons Stored	Tons Managed ³
Municipal Solid Waste	5,659,311	144,110	0	4,530,285	24,068	4,698,463
Construction & Demolition Debris	2,685,372	403,395	0	1,883,267	739,514	3,026,176
Industrial Waste	32,086	2,887	0	28,636	0	31,523
Land Clearing Debris	35,939	12,731	610	22,090	760	36,191
Other Wastes ⁴	142,683	0	0	137,668	0	137,668
Yard Trimmings	417,868	53,012	267,597	5,452	89	326,150
Food Scraps/Manure, etc.	52,074	0	52,052	0	0	52,052
NWW/Wood Materials	630,096	710,299	46,611	652	11,231	768,793
Total Waste Received	9,655,429	1,326,434	366,870	6,608,050	775,662	9,077,016
Incinerator Ash	169,537	139,637	0	173,685	0	313,322
TOTAL REPORTED	9,824,966	1,466,071	366,870	6,781,735	775,662	9,390,338

¹ "Tons Accepted" includes all waste accepted by permitted facilities including waste sent from one Maryland permitted facility to another.

² Only includes recycling/reused/composted/mulched waste that was captured by Maryland permitted solid waste acceptance and permitted NWW/Composting Facilities.

³ "Tons Managed" is equal to "Tons Recycled/Reused" + "Tons Composted" + "Tons Disposed" + "Tons Stored". "Tons Managed" is waste that was managed both in Maryland and outside of Maryland (see Figures 3 and 4 and Tables 14 and 15).

⁴ "Other Wastes" includes special medical waste, asbestos, and sewage sludge.

Refuse Disposal Systems

Under Maryland law, a refuse disposal system (“System”) includes an incinerator, transfer station, landfill system, landfill, solid waste processing facility, and any other solid waste acceptance facility. Appendix B gives a complete list of permitted solid waste acceptance facilities. Appendix C provides details on permitted landfill capacities. Additional information on each type of facility is provided below.

Municipal Landfill

A municipal landfill, which is also known as a MSW landfill, is designed, constructed, and operated so that all types of waste generated by a community, except waste specifically prohibited by solid waste regulations, can be accepted. During CY22, 24 Refuse Disposal Permits for municipal landfills were in effect. Of the 24 permits, 22 facilities have been developed. Of the 22 developed facilities, 21 facilities accepted MSW, managed/disposed MSW, and/or transferred recyclables to the marketplace.

The construction of Montgomery County Site 2 Municipal Landfill as a back-up facility to handle the county’s waste capacity in the future is on hold. The Mid-Shore Regional Solid Waste Municipal Landfill in Talbot County ceased its landfill operations in 2011. Under a multi-jurisdictional agreement, waste from the four Mid-Shore counties (Caroline, Kent, Queen Anne’s, and Talbot) is currently disposed of at the Midshore II Landfill in Caroline County. Details of MSW landfill waste management practices are presented in Table 4.

Table 4 – Permitted MSW Landfills

Jurisdiction	Facility Name (Landfill)	Ownership	Waste Accepted *	Waste Handled

Worcester	Central Sanitary	County	64,651	57,318	1,663
TOTAL			2,685,944	2,283,852	62,170

* Waste Accepted will not always equal the sum of the waste handled columns. For example, waste may be accepted in CY22, but not managed until CY23.

C&D Landfill

A rubble (C&D) landfill is a solid waste acceptance facility that is restricted to accepting waste derived from building construction, demolition, or remodeling, such as wood, metal, bricks (excluding refractory type) and masonry, cement and concrete, glass, shingles and roofing material, plaster and plasterboard, carpets, floor and wall tile, asphalt, insulation material, pipes, wires, and appliances; and debris derived from land clearing operations such as tree stumps, root mats, brush and limbs, logs, topsoil, vegetation, and rock. Paper or cardboard packaging or building materials are accepted, if they do not exceed 10% of the waste by volume. Empty paint containers and empty caulk or glaze containers are accepted, provided any remaining residual material is dried before being accepted and these items do not exceed 1% of the waste accepted at the rubble landfill by volume. Details of C&D landfill waste management practices are presented in Table 5.

Table 5 – Permitted C&D Landfills

Jurisdiction	Facility Name (Landfill)	Ownership	Waste Accepted *	Waste Handled	
				Waste Disposed	Waste Transported
Anne Arundel	Tolson & Associates Rubble Landfill	Private	107,087	48,867	884
Baltimore County	Days Cove Rubble Landfill Lateral Expansion	Private	155,083	154,920	163
	Honeygo Run Reclamation Center	Private	291,988	291,950	38

Jurisdiction	Facility Name (Landfill)	Ownership	Waste Accepted *	Waste Handled	
				Waste Disposed	Waste Transported
Prince George's	Ritchie Land Reclamation	Private	351,468	344,105	7,262
Queen Anne's	Baker Rubble	Private	20,274	20,274	0
TOTAL			925,900	860,116	8,347

* Waste Accepted will not always equal the sum of the waste handled columns. For example, waste may be accepted in CY22, but not managed until CY23.

Industrial Waste Landfill

An industrial waste landfill is a solid waste acceptance facility restricted to the acceptance of only non-hazardous industrial waste. Industrial waste is defined as any liquid, gaseous, solid, or other waste substance, or combination thereof, resulting from (a) any process of industry, manufacturing, trade, or business; or (b) the development of any natural resource, including agriculture. Industrial waste may include materials such as dusts, powders or sludges from pollution control devices, residuals from filters or cleaning of items or areas, and residual materials from a variety of processes (*e.g.*, sandblasting grit, paint sludge, oil/water separator grit, etc.). These materials must be characterized prior to disposal to ensure that they are not hazardous. Industrial wastes may also be disposed of in permitted MSW landfills. Details of industrial waste landfill waste management practices are presented in Table 6.

Table 6 – Permitted Industrial Waste Landfills

Jurisdiction	Facility Name (Landfill)	Ownership	Waste Accepted *	Waste Handled	
				Waste Disposed	Waste Transported
Baltimore City	Fort Armistead Road-Lot 15	Private	38,969	32,539	0
	Hawkins Pt. Plant	Private	29,137	29,137	0
	W. R. Grace and Co. – Davison Chemical Division	Private	14,732	14,732	0
Frederick	Essroc Cement Corporation	Private	0	0	0
TOTAL			82,838	76,408	0

LCD Landfill

A LCD landfill is a solid waste acceptance facility that is restricted to acceptance of the following waste: earthen material such as clays, sands, gravels, and silts; topsoil; tree stumps; root mats; brush and limbs; logs; vegetation; and rock. Details of LCD landfill waste management practices are presented in Table 7.

Table 7 – Permitted Landclearing Debris Landfills

Jurisdiction	Facility Name (Landfill)	Ownership	Waste Accepted *	Waste Handled	
				Waste Disposed	Waste Transported
Calvert	Hance Landclearing Debris	Private	0	0	0
	Howlin Landclearing Debris	Private	0	0	0
St. Mary's	Knott Landclearing Debris	Private	0	0	0
TOTAL ^			0	0	0

^ Knott Land clearing Debris is closed. Hance and Howlin Landclearing Debris are not accepting any waste.

Solid Waste Transfer Station

A solid waste transfer station is a solid waste acceptance facility where waste materials are taken from one collection vehicle (e.g., compactor truck, etc.) and placed in another transportation unit (e.g., over-the-road tractor-trailer, railroad gondola car, barge, or ship, etc.) for movement to other solid waste acceptance facilities. Individuals and businesses can dispose of a wide variety of solid waste materials at a transfer station. A typical transfer station may accept MSW, C&D, metals, wood waste, yard waste, recyclables, etc. Details of solid waste transfer station waste management practices are presented in Table 8.

Table 8 – Permitted Solid Waste Transfer Stations

* Waste Accepted will not always equal the sum of the waste handled columns. For example, waste may be accepted in CY22, but not managed until CY23.

Solid or Medical Waste Processing Facility

A solid or medical waste processing facility is a facility where a combination of structures, machinery, or devices are used to reduce or alter the volume, chemical characteristics, or physical characteristics of solid waste. This can include sorting for diversion of recyclables. In general, processes are performed either to remove recyclables or to reduce the volume that the waste occupies during transport or at final disposal (e.g., shredding). A wide variety of solid waste can be processed at these facilities. A typical solid waste processing facility accepts MSW, C&D, metals, wood waste, etc. Details of solid or medical waste processing facility waste management practices are presented in Table 9.

Table 9 – Permitted Solid and Medical Waste Processing Facilities

Jurisdiction	Facility Name	Ownership	Waste Accepted *	Waste Handled

** Peninsula Regional Medical Center is the only processing facility reporting medical waste.

Solid Waste Processing Facility and Transfer Station

Solid waste processing facilities and transfer stations are facilities that perform the functions of both a transfer station and a processing facility. Details of solid waste processing facility and transfer station waste management practices are presented in Table 10.

Municipal Solid Waste Incinerator/Waste-to-Energy Facility

A MSW incinerator/waste-to-energy facility is equipped with a furnace or combustion unit that uses controlled flame combustion for the thermal destruction of MSW, industrial waste, or special medical waste. Incinerators that are “waste-to-energy” facilities use the heat generated by combustion to create steam that is either used directly for heat or to drive electrically powered generators to produce energy. Details of MSW incinerator/waste-to-energy facility waste management practices are presented in Table 11.

Natural Wood Waste Recycling Facility

NWW consists of trees and other natural vegetative materials, including tree stumps and limbs, brush, root mats, logs, leaves, grass clippings, and unadulterated wood wastes. NWW does not include pallets, crates, lumber, wood chips, firewood, or other products that may be made from NWW, but have subsequently been processed. Owners or operators of facilities that recycle NWW must obtain a permit to operate under Code of Maryland Regulations (COMAR) 26.04.09. NWW recycling facility waste management practices are presented in Table 12. Details on NWW permits are provided in Appendix D.

* Waste Accepted will not always equal the sum of the waste handled columns. For example, waste may be accepted in CY22, but not managed until CY23.

Composting Facilities

Composting facilities are not considered a refuse disposal system and are not required to obtain a refuse disposal permit. However, these facilities are included in Part I because they generate waste and are permitted by MDE (e.g., composting, water, air, etc.). Composting means the controlled aerobic biological decomposition of organic waste material. Certain composting facilities are required to obtain composting permits as outlined in COMAR 26.04.11. Detailed information on composting in Maryland is available on MDE's Organics Diversion and Composting webpage at mde.maryland.gov/composting. Composting facility waste management practices are presented in Table 13.

Table 13 – Permitted Composting Facilities

* Tier 1 facilities only accept yard trimmings, while Tier 2 facilities may accept yard trimmings and certain additional materials, such as food scraps and animal manure.

Imported Solid Waste

Table 14 compares the tonnage of solid waste, by category, which was imported into the State to the total amount of solid waste managed at permitted solid waste acceptance and composting facilities in Maryland. Figure 2 illustrates the amount of imported versus Maryland-generated solid waste managed at permitted solid waste acceptance and composting facilities. In CY22, Maryland's permitted solid waste facilities accepted waste from Canada, Connecticut, Delaware, Florida, Georgia, Indiana, Kentucky, Massachusetts, Michigan, Minnesota, Montana, Nebraska, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Virginia, District of Columbia, West Virginia, and Wisconsin. Highlights include:

- * There was an increase of 25.2% of the amount of solid waste and organics imported (410,701 tons) into Maryland in CY22 compared to CY21 (327,909 tons).
- * The solid waste and organics imported into Maryland comprises 4.4% of over 9 million tons of solid waste managed at permitted Maryland solid waste acceptance, natural wood waste recycling, and composting facilities.
- * Ritchie Land Reclamation Limited Partnership Landfill in Prince George's County and Curtis Bay Energy Limited Partnership in Baltimore City received the bulk of C&D (125,697 tons) and SMW (22,390 tons) waste imported to Maryland, respectively.

C&D that was imported into Maryland was disposed of at privately-owned rubble landfills or was processed into segregated recyclables that were then transferred to mid-Atlantic recycling facilities.

Table 14 – Maryland Imported Waste

Solid Waste Category	Tons of Solid Waste Imported Into Maryland	Jurisdictions Where the Solid Waste Originated	Total Tons Managed
MSW	33,836	DE, NC, NJ, NY, OH, PA, SC, TN, VA, DISTRICT OF COLUMBIA, WV	4,698,463
C&D	275,483	DE, PA, VA, DISTRICT OF COLUMBIA, WV	3,026,176

Solid Waste Category	Tons of Solid Waste Imported Into Maryland	Jurisdictions Where the Solid Waste Originated	Total Tons Managed
Miscellaneous *	55,907	CANADA, CT, DE, FL, GA, KY, MA, MI, MN, MO, NE, NH, NJ, NC, NY, OH, PA, RI, SC, TN, TX, VA, VT, DISTRICT OF COLUMBIA, WV, WI	518,704
Organics	45,475	DE, PA, SC, VA, DISTRICT OF COLUMBIA	1,146,995
TOTAL	410,701		9,390,338

* Includes special medical waste, incinerator ash, non-hazardous industrial waste, asbestos, wastewater treatment plant sludge, land Clearing debris waste, organics and other wastes imported into Maryland for disposal/recycling.

Exported Solid Waste

Due to economic considerations and the desire to conserve disposal capacity in Maryland landfills, some of the waste generated in 18 counties and Baltimore City was transported to out of State facilities for recycling or disposal. There was an increase of 14.63% of the amount of solid waste exported in CY22 (2,654,353 tons) compared to the amount of waste exported in CY21 (2,315,499 tons). 40 of the 78 permitted and developed solid waste acceptance facilities that accepted waste in CY22 exported waste to 16 states and the District of Columbia. A small portion of waste was also sent to Germany.

Virginia was the most prevalent export destination for Maryland waste and accepted approximately 69% (1,838,118 tons) of the total exported waste. Figure 3 illustrates, by percentage, where solid waste captured by Maryland’s permitted solid waste acceptance facilities was managed. Table 15 gives a destination breakdown of solid waste exported by Maryland permitted solid waste acceptance facilities.

Table 15 – Maryland Exported Material Tonnage by State Destination

Solid Waste Category	Virginia	Pennsylvania	New Jersey	Other	Total (Tons)
MSW	1,358,699	536,110	31,457	14,204	1,940,470
C&D	468,809	207,145	0	6,426	682,380
Miscellaneous *	10,610	18,518	0	2,375	31,503
TOTAL (Tons)	1,838,118	761,773	31,457	23,005	2,654,353

* Includes special disposed medical waste, incinerator ash, non-hazardous industrial waste, asbestos, wastewater treatment plant sludge, and other wastes.

Solid Waste Management Practices

In CY22, the solid waste accepted at Maryland permitted solid waste acceptance and recycling facilities was managed by transporting the waste out of State, landfilling, incinerating, or recycling/reusing the waste in Maryland. Table 16 gives a breakdown of the management practices by Maryland permitted solid waste acceptance facilities and recycling facilities.

Table 16 – Maryland Solid Waste Management Practices

Solid Waste Management Method	Tons	Percentage of Total Solid Waste Managed
Landfilled in Maryland	3,220,376	35.0%
Exported and Disposed	2,451,353	22.8%
Exported and Recycled	203,000	2.4%
Recycled/Reused in Maryland	1,629,941	16.5%
Incinerated in Maryland	1,110,006	14.1%
Stored in Maryland Facilities	775,662	9.2%
TOTAL	9,390,338	100%

Part II – Waste Diversion

Introduction

In Maryland, waste diversion is defined as the amount of waste recycled and the amount of waste diverted from entering the waste stream through source reduction activities. Waste diversion saves energy, reduces greenhouse gases, other pollutants generated in the manufacturing process and at disposal facilities, conserves natural resources, and reduces the amount of waste disposed at solid waste acceptance facilities (*e.g.*, incinerators, landfills, etc.). MDE promotes and encourages waste diversion throughout Maryland by partnering with Maryland counties, including Baltimore City, and the public and private sectors. MDE also collaborates with other state agencies to increase the volume of materials diverted from landfills.

In this part, the quantities of waste disposed are gathered from two sources: (1) the Maryland Recycling Act (MRA) Tonnage Reporting Surveys, submitted by the counties and Baltimore City that contain information about solid waste known to the counties or Baltimore City to be exported directly out of state without passing through a Maryland permitted facility; and (2) the Solid Waste Tonnage Reports, submitted by Maryland permitted facilities.

Maryland’s Legislative Mandate

In 1988, the Maryland Recycling Act (MRA) (Chapter 536) mandated that Maryland reduce the overall amount of solid waste disposal in the State through improved management, education, and regulation. Each county, including Baltimore City, is required to develop and periodically update a recycling plan addressing certain topics. The plan must be reviewed and approved by MDE. The MRA has been amended since its original passage. Currently, a county with a population greater than 150,000 is required to recycle 35% or more of its waste, and a county with a population of

less than 150,000 is required to recycle 20% or more of its waste. The MRA excludes from its scope scrap metal, land clearing debris, construction and demolition debris, sewage sludge, hospital wastes, and waste generated by a single individual or business and disposed of in a facility dedicated solely for that entity's waste.

Recent legislation related to the Land and Materials Administration is available on MDE's *Recent Legislation* web page at mde.maryland.gov/programs/LAND/Pages/LMA-Legislation.aspx.

Maryland's 45.8% Waste Diversion Rate

The recycling rate plus the source reduction (SR) credit make up the waste diversion rate. Through the efforts of its citizens, businesses, and government agencies, Maryland achieved a Statewide waste diversion rate of 45.8% in CY22. The 45.8% waste diversion rate was composed of a 42.5% MRA recycling rate and a 3.3% SR credit. Figure 4 provides a historical breakdown of Maryland's waste diversion rate.

Maryland's 38.9% Recycling Rate

In CY22, Maryland residents and businesses recycled 38.9% of the MRA waste generated. This is a decrease from the 42.5% MRA recycling rate in 2021. The decrease in the recycling rate in 2022 is likely attributed to 2021's House Bill 280, Chapter 631, Maryland Recycling Act - Recyclable Materials and Resource Recovery Facilities - Alterations, that excludes incinerator ash from the definition of recyclable materials and repeals the authority of a county to earn a 5% resource recovery facility credit.

The MRA recycling rate is calculated as: $(\text{MRA recycling tonnage}) \div (\text{MRA recycling tonnage} + \text{MRA waste disposed})$.

Figure 5 summarizes the tons of recycling over the past several years, compared with recycling in 1992. Figure 6 shows a breakdown of the total MRA recycled by material in CY22. Compostables and paper materials constituted the largest portion of materials recycled. Table 17 details recycling and waste diversion totals for each Maryland county, including Baltimore City.

Table 17 – County Recyclables by Commodity in Tons for CY22

Compiled by the Maryland Department of the Environment from Reports Submitted for CY22

County	MRA Rate ² (%)	Mandatory Recycling Rate (%)	Waste Diversion Rate ³ (%)	Maryland Recycling Act (MRA) Materials							Non-MRA Recyclables ⁵	Total Recycling*

* Due to rounding, tonnage totals in this table may differ slightly from the sum of actual values (i.e., MRA Recyclables = 2,865,758.56, Non-MRA Recyclables = 5,588,502.80 tons, Total 8,454,261.36 tons.

1 Mid-Shore Regional Recycling Program includes Caroline, Kent, Queen Anne's, and Talbot Counties.

2 MRA Recycling Rate = (MRA recycling tonnage + RRF credit tonnage) ÷ (MRA recycling tonnage + MRA waste tonnage) x 100

3 Waste Diversion Rate = Recycling Rate + Source Reduction (SR) Credit (based on voluntary reporting of SR activities). **Bolded** rates include both recycling and SR activities. SR activities theoretically reduced the amount of waste generated by 327,268.64 tons.

4 Compostables include 1,182,488.66 tons of material that was composted/mulched and 44,273.32 tons recycled by other means.

5 Column includes materials, such as construction and demolition debris, land clearing debris and recycled fluids, which fall outside the scope of the standard MRA Recycling Rate but are reported by the counties as recycled materials. See Table 18 for a partial breakdown.

Maryland's 37% US Environmental Protection Agency (EPA) Recycling Rate

State recycling laws determine which types of materials are credited toward a state's recycling rate. The differences in state laws make the comparison of recycling activities between states difficult. To compare state data and generate a U.S. recycling rate, the EPA has developed recycling criteria that standardizes which materials count toward the recycling rate. This can then be used to compare data across states. The major differences between the EPA and Maryland recycling rates relate to Maryland allowing certain industrial materials and the reuse of certain materials (*e.g.*, retread tires, refurbished pallets, etc.) to count toward the MRA recycling rate. Based upon the information currently available to MDE, adjusting Maryland's recycling rate to EPA protocol reduces the amount of material allowed to count toward the recycling rate by 224,024 tons to 2,641,734 tons. Maryland's EPA recycling rate of 37% is just above the overall EPA U.S. recycling rate of 36.4% for 2018 (most recent available as of the writing of this report).

Maryland's 4.3% Source Reduction Credit

In CY22, 13 Maryland counties were able to add from 1 to 5 points to their waste diversion rates by conducting SR activities as a waste reduction strategy. They accomplished this by utilizing internet resources, demonstration sites (*i.e.*, backyard food scraps, food donation, and yard waste composting), and publications on reuse practices, food residual donation, and yard waste reduction. A complete list of SR activities and a breakdown of Maryland SR activities in CY22 is available on MDE's Maryland State, County, and City Recycling webpage at mde.maryland.gov/programs/Land/RecyclingandOperationsprogram/Pages/recyclingrates.aspx.

Beyond the Maryland Recycling Act

MDE encourages the recycling of all materials because of the environmental and economic benefits provided. Local governments continue to seek recycling opportunities beyond those that apply toward the MRA rate, while businesses are constantly looking for recycling opportunities to reduce the cost of waste disposal. However, since these "non-MRA recyclables" do not count toward a county's mandated recycling rate, counties place varying levels of importance on gathering this information. This should be considered when assessing the completeness of non-MRA recyclables data. Nearly 5.6 million tons of non-MRA materials were reported as recycled in CY22. Table 18 offers a breakdown by category of the non-MRA materials reported as recycled in CY22. Table 19 provides a breakdown of each county's, including Baltimore City's, overall (MRA & Non-MRA) recycling rate.

Table 18 – Recycling of Non-MRA Materials in Tons

*Compiled by the Maryland Department of the Environment
from Reports Submitted for Calendar Year 2022*

MATERIAL	TONS RECYCLED
Antifreeze	1,210

State Roads Data	NA	376,882	NA
Maryland Totals	38.86	5,588,504	56.41

¹ See Table 17 for details.

² Includes materials, such as construction and demolition debris, land clearing debris and recycled fluids, which fall outside the scope of the standard MRA Recycling Rate but are reported by the counties as recycled materials. See Table 18

³ Overall Recycling Rate = (MRA recycling tonnage + Non-MRA recycling tonnage) ÷ (MRA recycling tonnage + Non-MRA recycling tonnage + MRA waste tonnage + Non-MRA waste tonnage) x 100

⁴ Mid-Shore Regional Recycling Program includes Caroline, Kent, Queen Anne's, and Talbot Counties.

Maryland's 23.3 % All StAR Recycling Rate

The All StAR (All State Agencies Recycle) Program is the name of the State government agency recycling program that is designed to help the State government reach its recycling goals. Each All StAR agency designates a Recycling Coordinator to manage recycling activities at their various sites throughout Maryland. Recycling Coordinators provide technical support to encourage recycling and to facilitate reporting on collection activities.

Maryland State government is required under Section 9-1706 of the Environment Article, Annotated Code of Maryland, to achieve a recycling rate of at least 30%, or an amount that is determined "practical and economically feasible," but in no case less than 15%. State agencies are required to have recycling plans that address the placement of collection bins and the recycling of aluminum, glass, paper, and plastic at all State-owned or operated buildings where it is determined to be practical and economically feasible. Each State agency's recycling plan is on file with MDE. Individual site recycling plans are maintained by each agency recycling coordinator and at each State facility.

In CY22, State agencies recycled 18,068.88 tons of MRA materials for an overall MRA recycling rate of 23.3%. Figure 7 provides a 5-year history of Maryland's All StAR recycling rate and Figure 8 summarizes the recycling tonnages since 2018. Table 20 summarizes the performance of each State agency participating in the All StAR program.

Also, the State government recycled 294,191 tons of non-MRA materials, including construction and demolition debris, antifreeze, motor oil, scrap metal, land clearing debris, concrete, and asphalt, that do not count toward the MRA Recycling Rate. A complete breakdown of the CY22 All StAR statistics is available under "State Agency Recycling" on MDE's Waste Diversion in Maryland webpage at mde.maryland.gov/recycling. MRA tonnages reported by State agencies are included in the CY22 recycling totals reported by the counties (Table 17).

^ The 1988 Maryland Recycling Act mandates a State Government recycling rate of at least 30%.

State agencies achieve cost savings by boosting the amount of waste diverted to recycling and, to an even greater extent, by reducing the total amount of waste generated.

MDE provides technical support and publishes the *All StAR News*, a newsletter devoted to recycling in State government; see Appendix E for an example. Finally, MDE acts as an information clearinghouse by forwarding any relevant recycling information to the appropriate State offices.

The ability to contract with a recycling contractor for recycling pick-up service at a reasonable price is the largest obstacle to increasing the All StAR recycling rate. Companies that process and collect recyclables are in business to make a profit. This is possible in large offices or offices in metropolitan areas where the quantity of recyclables generated makes it economically feasible to offer recycling pick-up service. In small offices or offices in rural areas, insufficient recyclables may be generated to make it economically feasible for recycling pick-up service. To address this issue, State office leases issued through the Lease Management and Procurement Division of Maryland Department of General Services (DGS) require recycling to be integrated into State office space leases and janitorial contracts. This requirement, effective in 2013, is being phased in as old leasing contracts expire.

In addition, State agency recycling rates could be improved by designating a recycling coordinator for each State office that has the responsibility and authority for ensuring recycling goals are met. Finally, State offices must have the means necessary to support successful recycling programs to execute a recycling contract and establish material staging areas, and staff tasked with identifying proper recycling bin locations.

Greenhouse Gases and Energy Consumption

Using the EPA's Waste Reduction Model (WARM), Tables 21 and 22 detail greenhouse gas (GHG) and energy scenarios over the lifecycle of common recyclable materials when comparing alternative solid waste management methods to the landfilling of a product (*i.e.*, from production of a glass bottle → use of a glass bottle → disposal/recycling of glass bottle → production of a new glass bottle). Except for the recycling (*i.e.*, composting) of mixed organics, in all cases where either recycling or source reduction is used instead of landfilling, there are reductions in GHG emissions and energy used. Only when combusting a material instead of landfilling it were there increases in GHG emissions or energy used.

Tables 23 and 24 detail product lifecycle GHG emissions and energy use with and without waste diversion activities in Maryland in CY22. In Table 22, for example, the GHG emissions associated with the lifecycle of glass is 8,609 metric tons of CO₂ equivalent without waste diversion (*i.e.*, recycling and source reduction) activities, and -44,919 metric tons of CO₂ equivalent with Maryland's waste diversion activities, for a total savings of 53,528 (*i.e.*, 8,609 + 44,919) metric tons of CO₂ equivalent. Additional information on EPA's WARM is available at epa.gov/warm.

Table 21 – Per Ton Greenhouse Gas Emissions ^

Material	MTCO ₂ E* – Landfilled	MTCO ₂ E* – Source Reduced	MTCO ₂ E* – Recycled	MTCO ₂ E* – Combusted
Glass	0 **	(0.55) **	(0.30) **	0.01 **
Mixed Metals	0 **	(3.67) **	(4.41) **	(1.04) **
Mixed Organics	0 **	N/A **	(0.37) **	(0.36) **
Mixed Paper	0 **	(6.21) **	(3.69) **	(0.63) **
Mixed Plastic	0 **	(1.89) **	(1.05) **	1.24 **

^ Comparisons are vs. landfilled. To make comparisons easier, values have been adjusted to assign “Landfilled” a value of 0. Actual, unadjusted values can be found in the WARM model at epa.gov/warm.

* MTCO₂E = Metric tons of carbon dioxide equivalent. It is a measure of carbon dioxide emissions and is equal to a unit of mass equal to 1,000 kg (2,205 lbs.).

** Values vs. the landfilling of the material. Assigns MTCO₂E – Landfilled a value of 0. A **negative value** (i.e., a value in parentheses) indicates an emission reduction, while a **positive value** indicates an emission increase compared to the landfilling of a material.

Table 22 – Per Ton Energy Use ^

Material	BTU* (million) – Landfilled	BTU* (million) – Source Reduced	BTU* (million) – Recycled	BTU* (million) – Combusted
Glass	0 **	(7.17) **	(2.40) **	(0.05) **
Mixed Metals	0 **	(51.13) **	(66.82) **	(11.36) **
Mixed Organics	0 **	N/A **	0.50 **	(2.50) **
Mixed Paper	0 **	(29.29) **	(20.41) **	(6.51) **
Mixed Plastic	0 **	(54.72) **	(39.47) **	(13.77) **

^ Comparisons are vs. landfilled. To make comparisons easier, values have been adjusted to assign “Landfilled” a value of 0. Actual, unadjusted values can be found in the WARM model at epa.gov/warm.

* BTU = 1 BTU is a unit of power that is equal to the amount of energy needed to heat 1 pound of water 1° F. It is also used to describe the heat value (energy content) of fuels.

** Values vs. the landfilling of the material. Assigns BTU (million) – Landfilled a value of 0. A **negative value** (i.e., a value in parentheses) indicates a reduction in energy consumption, while a **positive value** indicates an increase in energy consumption compared to the landfilling of a material.

Table 23 – Maryland Waste Diversion and Greenhouse Gas Emissions for CY22

MRA Material	MTCO ₂ E* NWD^	MTCO ₂ E* WD^^	MTCO ₂ E* Savings
Glass	8,609	(44,919)	(53,528)
Mixed Metals	(172,791)	(2,095,373)	(1,922,582)
Mixed Organics	996,774	187,667	(809,107)
Mixed Paper	(2,226)	(3,730,149)	(3,727,923)
Mixed Plastic	329,960	104,124	(225,836)
Miscellaneous	(11,060)	(116,976)	(128,036)
TOTAL	1,149,266	(5,695,626)	(6,867,012)

* MTCO₂E = Metric Tons of Carbon Dioxide Equivalent

^ NWD = No Waste Diversion (baseline = 74.4% landfilled and 25.6% incinerated)

^^ WD = Waste Diversion from Maryland CY22 Waste Diversion Totals

Note: A **negative value** (i.e., a value in parentheses) indicates an emission reduction; a **positive value** indicates an emission increase.

Table 24 – Maryland Waste Diversion and Energy Use for CY22

(in million BTUs)

MRA Material	BTUs* NWD^	BTUs* WD^^	BTU* Savings
Glass	100,534	(372,963)	(473,497)
Mixed Metals	(1,870,380)	(31,434,914)	(29,564,534)
Mixed Organics	(1,524,006)	(810,753)	713,253
Mixed Paper	(4,915,221)	(21,245,143)	(16,329,922)
Mixed Plastic	(3,281,448)	(8,396,465)	(5,115,017)
Miscellaneous	(956,005)	(1,105,988)	(149,983)
TOTAL	(12,446,526)	(63,366,226)	(50,919,700)

* BTU = British Thermal Unit – the amount of energy needed to heat one pound of water one degree Fahrenheit

^ NWD = No Waste Diversion (baseline = 74.4% landfilled and 25.6% incinerated)

^^ WD = Waste Diversion from Maryland CY22 Waste Diversion Totals

Note: A **negative value** (*i.e.*, a value in parentheses) indicates a reduction in energy consumption; a **positive value** indicates an increase in energy consumption.

The 6.9 million metric tons of CO₂ equivalent emissions savings produced by Maryland’s waste diversion activities in CY22 (Table 23) are the equivalent of removing over 1.45 million passenger cars from the roadway each year or conserving over 772 million gallons of gasoline, or over 286 million cylinders of propane used for home barbeques. The nearly 51 trillion British Thermal Unit (BTU) energy savings reported in Table 24 are the equivalent of the annual energy consumption of over 555 thousand households (*i.e.*, 24.2% of the estimated 2,294,270 households in Maryland in CY20), or the amount of energy contained in over 8.7 million barrels of oil or over 422 million gallons of gasoline. These reductions are important to meeting Maryland’s mandated climate change goals.

Sustainable Materials Management (SMM) Metrics and Goals

As was directed in the *Waste Reduction and Resource Recovery Plan for Maryland* a series of voluntary statewide metrics and goals were established to track the State’s progress in SMM. The goals are to be achieved by 2035. Table 25 sets forth those goals and the status in achieving them.

Table 25 – SMM Goals & Status

SMM Goals	2035 Target	Current Status
Waste Generation Per Capita	5.5 lbs./person/day	6.89 lbs./person/day
GHG Emissions Reductions	Reduction of 1.2 million MTCO ₂ e compared to 2016	Increase of 2.0 million MTCO ₂ e compared to 2016
Reduction in Energy Use	Reduction of 5.1 trillion BTUs compared to 2016	Increase of 12.9 trillion BTUs compared to 2016

SMM Goals	2035 Target	Current Status
Material-Specific Recycling Rates	Food Scraps – 60% Glass – 55% Metal – 75% Paper Products – 65% Plastic – 25% Yard Trimmings – 85%	Food Scraps – 24.35% Glass – 57.68% Metal – 70.94% Paper Products – 41.25% Plastic – 11.87% Yard Trimmings – 84.61%
Overall Statewide Recycling and Waste Diversion Rate	Recycling – 55% Waste Diversion – 60%	Recycling – 38.86% Waste Diversion – 43.11%

Special Programs

From July 2022 through June 2023 MDE continued implementing special programs designed to expand recycling and protect public health and the environment.

Recycling Marketing Development

Passed during Maryland’s 2021 legislative session, Maryland’s recycling market development law requires MDE to facilitate a recycle marketing program. The law requires the Office of Recycling in MDE to promote the development of markets for recycled materials and recycled products in the State. It also requires MDE to evaluate the availability of recycling markets and identify businesses in the State that use recycled materials.

During FY2023, MDE held regional meetings with recycling coordinators, hosted on-line workshops and individually met with businesses to determine how the state can support recycling markets and businesses.

In FY23, MDE held stakeholder meetings that offered opportunities to provide feedback on how the state can support increased recyclable materials and products. Continuing to work with state agencies, enhance education and outreach programs directed at recyclable materials and products. MDE will also work with federal and state agencies to fund recycling opportunities through the Bipartisan Infrastructure Law. MDE will investigate how state agency reports on recycling programs and what tools may be available to support the recycling market development law.

To address the transparency of MDE’s investigation and increased presence in Recycling Market Development

- Update the website and send notice to stakeholders on grants where applicable.
- Consult with regional and national stakeholders on recycling markets, specifically on hard-to-recycle materials and contamination of ‘curbside’ recycled materials.
- Public workshop on recycling markets with corresponding breakout rooms to discuss: innovation and business development; business identification and marketing; and, education and outreach. Summary can be found at <https://mde.maryland.gov/programs/land/RecyclingandOperationsprogram>

[/Documents/Summary%20of%20Notes%20%20RMD%2012%20of%202022%20workshop.pdf](#).

- The timeline for implementation of the Recycling Market Development law is available at https://mde.maryland.gov/programs/land/RecyclingandOperationsprogram/Documents/HB164%20Timeline%20Outline_updatedJune2023.pdf.
- Coordinated meetings with state and local commerce programs to investigate potential businesses expansion into the state for recycling markets. State agencies included Department of Commerce, Department of Transportation, and Department of Public Safety and Correctional Services.

The law also required the Department of Commerce, the Department of General Services, the Department of Transportation, and the Maryland Environmental Service to report to MDE on relevant programs, tools, training guides, campaigns, and technologies available for promoting the development of markets for recycled materials and recycled products in the State, including efforts in State government to increase the use, reuse, and remanufacturing of recycled materials and the use of recycled products. The reports provided in FY2022 are found in Appendix F.

Organics Recycling and Waste Diversion – Food Residuals

Passed during Maryland’s 2021 legislative session, Maryland’s food residuals law requires certain persons that generate food residuals to separate said residuals and divert them from refuse disposal systems. Beginning January 1, 2023, the law applies to a person that generates at least two tons of food residuals each week and beginning January 1, 2024, it applies to a person that generates at least one ton of food residuals each week. A person is only subject to the requirement to separate and divert food residuals if the residuals are generated within 30 miles of an organics recycling facility with capacity and willingness to enter into a contract to accept all of the person’s food residuals. Diversion may be accomplished by any combination of the following: reducing residuals generated, donating servable food, managing residuals in an organics recycling system on-site, providing collection and transportation for agricultural use, and/or providing collection and transportation for processing in an organics recycling facility.

To facilitate this law, MDE published regulations to further define the requirements necessary to comply with the law. The regulations became effective December 26, 2022. MDE created a detailed compliance guide with frequently asked questions published and sent to all those on the stakeholder list prior to the law’s January 1, 2023 effective date. MDE also held webinars on those potentially required to divert and provided a detailed explanation of the new regulations, which was published on the MDE dedicated website for Food Residual Diversion including a copy of the recorded webinar.

Additional outreach and support provide in FY2023 include:

- April 2023, MDE published a document outlining source reduction activities and relevant case studies for food residual diversion, this document is available at:

<https://mde.maryland.gov/programs/land/RecyclingandOperationsprogram/Documents/Source%20Reduction%20Suggestions%20and%20Case%20Studies%20MDE%20APR%202023.pdf>.

- [Reminder notifications](#) to those potentially required to divert.
- Determination of Applicability of the Food Residuals Diversion that describes entities that may be required to divert their food residuals in both English

and Spanish
https://mde.maryland.gov/programs/land/RecyclingandOperationsprogram/Documents/Factor_Estimates_by_Industry_Sector_ESP.pdf.
- Outline of required documentation necessary to be maintained in order to be compliant with the law, included in the Determination of Applicability of the Food Residual Diversion Requirement, Appendix A.
- Developed information guide and an online application form
<https://mde.maryland.gov/programs/land/RecyclingandOperationsprogram/Documents/Waiver%20Application%20Form%20-%20Food%20Residuals%20Diversion%20Law%20%28Dec%202022%29.pdf>
required in order to request a waiver from the food residual diversion requirements.
- Published a GIS online map which illustrates known organics recycling facilities in and around Maryland as well as each facility's 30-mile "buffer". The map only includes organic recycling facilities that process food residuals.
- MDE published Anerobic Digestions Facility Permitting Guidance and Composting Facility Permitting Guidance documents in September to the MDE website.
- Presented at the 2023 MAEOE Conference on waste diversion and provided specific information on the food residual diversion inclusion at schools.
- Coordinated a visit to Philadelphia Curran-Fromhold Correction Facility with a variety of programs within Maryland Department of Public Safety and Correctional Services (DPSCS) to determine how to support similar endeavors within Maryland's correctional programming.
- Coordinated with Maryland Stadium Authority (MSA) and Baltimore City Department of Public Works, Zero Waste and Office of Sustainability to determine pathways of presentation for food residual diversion and

recycling marketing within Orioles and Ravens games in which MSA is the facility owner and operator.

- Held a webinar directed towards all Maryland county health department officers to provide explanation of the requirements of the law.
- MDE holds an ex-officio seat on the Maryland Food System Resiliency Council <https://mdem.maryland.gov/Pages/md-fsrc.aspx> and regularly participates in the Environment and Production subcommittee.
- Coordinated one on one with industries and individual businesses regulated under the law.
- Collaborated with Maryland Department of Agriculture, state chemist office, to understand the animal feed regulations and requirements associated with this opportunity within the food recovery hierarchy.
- Presented at the Maryland Brewers Association and the Maryland Distillers Guild on the requirements of the food residual diversion law.
- Presented to Food Recovery Organizations on the requirements of the law and regulation and received specific feedback on concerns and requests to provide additional food donation guidance for donation protocols.
- Coordinated with Maryland State Department of Education Food and Nutrition Services on the requirements of the law and with the Office of Teaching and Learning for the potential to incorporate theories of waste into all subject discussions.

MDE granted 1 waiver to the University of Maryland, Baltimore County in FY2023, which is published on the MDE website.

Expanded Polystyrene (EPS) Ban

Maryland law bans the sale and/or use of food service products composed of expanded polystyrene (EPS), commonly referred to under the trademark name of Styrofoam. The county departments of health or environmental protection oversee the enforcement of the law, and have the authority to assess fines for noncompliance. Violations found during inspections, any fines assessed and any corrective action taken by violators are reported by the counties on a quarterly basis to MDE. In FY23, counties reported a total of 67 violations of the EPS ban, with 4 violations earning fines of \$200 each and 1 violation receiving a \$100 fine. All violations were either corrected on-site at the time of inspection and received no fine, were given 30 days to come into compliance without a fine, or were fined for the violation. Information on the EPS can be found on MDE's EPS Food Service Products

Ban

<https://mde.maryland.gov/programs/land/RecyclingandOperationsprogram/Pages/Expanded-Polystyrene-Food-Service-Products-Ban.aspx> web page.

Newsprint

Maryland law mandates that, on a Statewide basis, newspapers distributed in Maryland shall contain at least 40% recycled content newsprint. To determine compliance with the law, publishers are required to file quarterly and annual reports with MDE. In the year following a reporting period (each reporting period is

comprised of the current calendar year and the immediately preceding two calendar years) where the statewide recycled content percentage requirement is not met, each newspaper publisher who distributes a newspaper in Maryland is required to satisfy the recycled content percentage requirement or pay a fee of \$10 for each ton a publisher falls below the 40% requirement. In the reporting period ending CY22, the newsprint recycled content percentage was 0.00 %. For CY22, Maryland newspapers were granted a waiver from the 40% requirement due to the lack of paper stock.

Table 25 contains 36 known publishers that distribute 85 different newspapers in Maryland. Working with the Maryland/DC Press Association and publishers, MDE continues to seek increased compliance from publishers who did not comply with the reporting requirements.

Table 26 – Maryland Newspaper Publishers

Publisher	Content%	Publisher	Content%
A&C Business News	NR	Greenbelt Cooperative Publishing	NR
Afro-American Newspapers	NR	Herald-Mail	NR
American Farm Publications	0.0	Independent Newspapers, Inc.	0.0
Asian Fortune	NR	Korea Daily	NR
Baltimore Business Journal	0.03	Maryland Coast Dispatch	NR
Baltimore Sun Media Group	0.0	Morgan Messenger	0.0

Dow Jones & Company	0.0	Washington Business Journal	NR
Express Publications Company, LLC	0.0	Washington Post	0.0
Flag Communications	0.0	Washington Times	0.0
FT Publications, Inc.	NR		
Gannett Company, Inc.	0.0	Statewide	0.00
NR – Did not report		% based upon partial reporting period data	

Telephone Directory

The MRA requires telephone directory publishers that in the previous calendar year used at least 50 tons of directory stock in telephone directories distributed in Maryland to use directory stock with a recycled content of at least 40%, by weight. If a publisher does not meet 40% recycled content, it is required to pay a fee of \$10 per ton for each ton the publisher falls below the 40% requirement. Publishers of telephone directories must submit to MDE an annual report detailing the recycled directory stock content used in their directories. Any publisher that fails to submit the required report is deemed to have failed to meet the percentages established.

There are four known publishers of telephone directories distributed in the State of Maryland. In CY22, recycled content for these directories was reported as follows:

- * Dex Media (Thryu) – 0% recycled content;
- * Ogden Directories, Inc. – Distributes less than 50 tons of directory stock, therefore is exempt from reporting requirements;
- * Vivial – Distributes less than 50 tons of directory stock, therefore is exempt from reporting requirements; and
- * Ziplocal – Did not report.

In CY22, Dex Media was granted a 1-year exemption from meeting the 40% recycled content requirement due to the lack of availability of paper stock.

Electronics Recycling (eCycling)

Computers, televisions, and other consumer electronics are a rapidly growing part of the waste stream. The potential environmental and health threats posed by discarded computers and other consumer electronics that may contain toxic materials such as lead, mercury, cadmium, and chromium, continue to raise concerns about these products' disposal.

In 2005, Maryland became the third state to enact electronics recycling legislation. The Statewide Electronics Recycling Program (SERP) requires manufacturers of covered electronic devices (CED) to register with MDE and pay an annual registration fee prior to selling their products in Maryland. A retailer may not sell a CED unless the manufacturer is registered. The annual registration fee is based upon the number of CEDs sold in Maryland the previous year. A reduced registration fee is available for manufacturers who have a Department-approved takeback program. Registration fees may be used by MDE to award grants to counties and municipalities to conduct CED recycling activities.

One-hundred seven (107) manufacturers registered with MDE and were authorized to sell their products in Maryland in CY22. Fifty-four (54) manufacturers have MDE-approved free takeback programs. Of these, 3M Company, Acer America Corporation, Apple, Inc, ASUS Computer International, ATEN International Co., Ltd, Contixo, Inc, Dell Marketing LP, Element TV Company, LP, EliteLux Technologies, Inc, Emblem Solutions, LLC, Google, Inc, Microsoft Corporation, Motorola Mobility, LLC, NOOK Digital LLC a/k/a barnesandnoble.com, LLC, Panasonic Corp of North America, Samsung Electronics America, Inc, and Sony Electronics, Inc. reported recycling 187 tons through their free recycling programs in CY22. The remaining manufacturers reported 0 tons of Maryland electronic recyclables.

MDE performed 356 inspections at 356 electronics retailers during FY23. The inspections resulted in the issuance of 10 Site Complaints against retailers for

selling unregistered manufacturer brands. 100% of the Site Complaints were successfully resolved in FY23.

Information on Maryland’s eCycling program is available on MDE's webpage at mde.maryland.gov/ecycling. Table 27 gives a breakdown of the electronics equipment collected in CY22. Figure 9 summarizes the electronics tonnage totals collected since collection began in 2001. An additional 4,853 tons of electronics from commercial businesses were reported by the counties in CY22 as having been recycled. These were not part of residential eCycling programs.

Table 27 – eCycling Collection Programs

County	Date(s)	Tons Collected
Subtotal Maryland	2011-2021	71,867.78
Anne Arundel	2022	203.16
Baltimore City	2022	256.82
Baltimore County	2022	205
Calvert	2022	230.73
Carroll	2022	53.25
Cecil	2022	24
Charles	2022	33.83
Garrett	2022	23.44
Harford	2022	95.81
Howard	2022	323.05
Midshore Region	2022	4.77
Montgomery **	2022	1,191.96
St. Mary’s	2022	117
Worcester	2022	1
Sub-Total -- 2022		2,763.82
TOTAL 2011-2022		74,631.60

** Totals from the City of Takoma Park’s permanent eCycling program were included in Montgomery County’s permanent total. Totals from the City of Laurel’s and the City of College Park’s permanent eCycling programs were included in Prince George’s County’s permanent total.

Mercury Recycling

Section 6-905.1 of the Environment Article Section, Annotated Code of Maryland prohibits the sale of mercury-containing thermometers, except those sold in hospitals or other places where medical services are provided by medical service professionals, beginning in 2002. Section 6-905.2 Additional legislation enacted in 2006, Environment Article Section 6-905.2, prohibits the sale of mercury-containing thermostats by October 1, 2007.

Household Hazardous Waste (HHW)

Section 9-1801 of the Environment Article Section, Annotated Code of Maryland, defines Household Hazardous Waste (HHW) as any waste material, including garbage or trash, derived from a household that would be listed as hazardous waste under the Resource Conservation and Recovery Act, but for the fact that the waste is derived from a household. Household hazardous waste may include gardening chemicals, cleaning agents and solvents, motor oils, paint, pesticides, and preservatives.

Maryland does not regulate HHW as hazardous waste and federal law allows for the disposal of HHW in household trash. However, due to the potential of HHW to cause physical injury, contaminate septic tanks or wastewater treatment systems, and present hazards to children and pets, MDE recommends the proper recycling/disposal of HHW materials at local collection programs. Information on HHW programs in Maryland is available at mde.maryland.gov/hhw

Promoting Recycled Products

The collection, sorting, and use of recycled materials in the manufacturing of new products are just part of the recycling process. Once manufacturers turn recyclables into products, it becomes every citizen's responsibility to "close the loop" and buy products made of recycled material. Details are available at <https://mde.maryland.gov/programs/land/recyclingandoperationsprogram/pages/buyrecycled.aspx>. MDE works to create demand for these products by promoting a Buy Recycled training manual and program developed by the Maryland Environmental Service (MES) for government purchasing agents. The training manual provides information on increasing purchases of products made with recycled materials.

MDE encourages State government to increase the use of products made with recycled materials by supporting the following procurement initiatives:

- * Participating on the Maryland Green Purchasing Committee (<https://dgs.maryland.gov/Pages/GreenPurchasing/index.aspx>). The committee was created on October 1, 2010 (Chapters 593 & 594, Acts of 2010) and provides information, assistance, and guidelines for environmentally-preferable purchasing, so that Maryland government is procuring goods and services that have less impact on human health and the environment.
- * Working with the Maryland Department of General Services (DGS) to promote government purchasing of materials with recycled content.
- * In FY22, buying paper products made with recycled content paper was the rule, not the exception, with nearly all the paper products (*e.g.*, bond paper, computer paper, etc.) purchased made from recycled content paper.
- * Details on State procurement guidelines along with lists of products available with recycled content such as picnic tables, park benches, and re-refined motor oil are available on the DGS webpage at dgs.maryland.gov/Pages/GreenPurchasing/Resources/ProcurementOfficers.aspx. Local jurisdictions in Maryland can piggyback on State procurement contracts.
- * Boilerplate language stating, "All products used in packing to cushion and protect during the shipment of commodities are to be made of recycled, recyclable, and/or biodegradable materials" is included in all Maryland Invitation to Bid Solicitations and Purchase Orders.

Recycling Resources

MDE aids businesses that are interested in participating in Maryland's recycling program by guiding them through the State regulatory framework, consulting on recycling program implementation, and providing information on the markets for recyclable materials. The following provides a more detailed description of these activities.

Recycling Markets

Recycling Market Directory – The success of Maryland's recycling programs is linked to finding markets for the materials collected. The State's material recovery

facilities (MRFs) are strategically located to ensure materials reach their market economically.

Businesses can access the Recycling Market Directory directly at mdrecycles.org to find a market for recyclable materials. The website is designed to promote commercial recycling in Maryland and is searchable by commodity. The mdrecycles.org completed a major revision on June 30, 2023 to remove any obsolete businesses and add new, known recycling entities. Additional links to other companies are available on MDE's recycling webpages for the specific commodity in question.

Automobile Tires – The Scrap Tire Recycling Act authorized the MES to establish a scrap tire recycling system, to address scrap tires generated in Maryland, that includes scrap tire collection facilities and scrap tire haulers. MDE maintains a list of approved scrap tire facilities and haulers on MDE's webpage at mde.maryland.gov/programs/LAND/RecyclingandOperationsprogram/Pages/scrap_tire.aspx.

A detailed report on scrap tires in Maryland is available in the *Maryland Scrap Tire Program's Annual Report* available on MDE's webpage at mde.maryland.gov/programs/LAND/Pages/LandPublications.aspx.

Batteries – The metals and plastics contained in batteries can be recycled and used to make other products, including new batteries. In addition, the recycling of batteries allows the collection of hazardous metals so that they can be more easily managed. Specific HHW information is available through each county. County contact information is available on MDE's HHW webpage at mde.maryland.gov/hhw. Old automobile batteries can be returned to a retail establishment where a replacement battery is purchased, and rechargeable battery collection locations can be obtained by calling 800-8BATTERY (822-8837). Additional battery recycling resources for residents and businesses are available by accessing the Recycling Market Directory at mdrecycles.org. For single use, lithium-ion batteries, MDE shares recommendations on the Recycling Market Development webpage by identifying the [national resource Call2Recycle \(https://www.call2recycle.org/what-can-i-recycle/\)](https://www.call2recycle.org/what-can-i-recycle/) which has detailed information on where to and how to divert for recycling.

White Goods – White goods are defined as large household appliances such as refrigerators, stoves, air conditioners, and washing machines. Once collected, environmentally detrimental materials (*e.g.*, chlorofluorocarbons, etc.) are removed for proper disposal, and the remaining materials (usually metal) from white goods are sold for scrap and made into new products. Every jurisdiction accepts white goods from residents for recycling. Contact each jurisdiction for details and any questions concerning the proper collection procedures. Contact information is also available in the "State, County, and City Contact Info" section on MDE's webpage at mde.maryland.gov/programs/LAND/RecyclingandOperationsprogram/Pages/Cou

[nty-Recycling-Services.aspx](#). Additionally, resources for residents and businesses are available under “Metals” in the “Recycling Market Directory” available on MDE’s recycling webpage.

Permitting Guidance

MDE provides and regularly updates documents to assist recycling and composting businesses in understanding environmental permitting procedures and requirements.

MDE’s *MDE Guide to Environmental Permits and Approvals* webpage at <https://mde.maryland.gov/programs/Permits/Pages/index.aspx> contains important information about the different types of permits, licenses, and approvals issued by MDE. These permits affect businesses and individuals ranging from well drillers, dry cleaners, and gas stations, to power plants and other large industrial facilities. MDE developed this guide as part of its continued commitment to provide excellent service to its permitting customers. The information in this guide can help businesses determine their permitting needs.

Composting Facilities Permitting Guidance Specific information on composting in Maryland and required permits and approvals is available on MDE’s composting webpage at mde.maryland.gov/composting.

Permitting Guidance for Maryland Anaerobic Digestion Facilities Information intended to assist prospective anaerobic digestion facilities in identifying applicable state government laws and regulations is available on MDE’s composting web page at mde.maryland.gov/composting.

Waste Diversion Guide

Commercial Waste Diversion Implementation Guide – This document assists local recycling coordinators working with businesses to promote recycling and source reduction. Case studies detailing successful commercial waste diversion efforts are provided. The guide is available on MDE’s webpage at mde.maryland.gov/programs/Land/Documents/mde.state.md.us/assets/document/recycling/commercialwasteguide.pdf.

Public Resources

As waste diversion programs continue, it is important for MDE to keep the public informed of waste diversion programs in the State. From July 2022 through June 2023 MDE provided assistance and public education through efforts such as America Recycles Day, web resources, and county solid waste and recycling managers meetings.

Food Waste Minimization and Related Activities – A Toolkit for Maryland Schools

MDE created this toolkit to help schools reduce, donate, and recycle surplus food to avoid waste, feed those in need, and promote healthy soils. The tool kit contains information and resources to help administrators, educators, and staff plan curriculum and policies for their students to learn about and engage in environmentally sound approaches to daily living.

America Recycles Day (ARD)

America Recycles Day (ARD) is a national event that promotes recycling, source reduction, and buying products made from recycled materials as objectives for a more sustainable society. MDE held the 21st Annual "Rethink Recycling" Sculpture Contest on November 18, 2022.

The "Rethink Recycling" Sculpture Contest featured 60 entries from 16 different high schools across Maryland. The Sculpture Contest challenged students to use innovatively and artistically recycled or reused materials as a solution to waste reduction. With instruction to create a sculpture that promotes ARD, students created artworks from items such as plastic bottles, cans, scrap metal, compact discs, and other materials. Participants were judged based on creativity, use of materials, and workmanship. In addition, a "People's Choice" award was given to the sculpture that received the most votes from attendees of the contest.

Contest details are available on the "Education and Outreach" section of MDE's waste diversion webpage at:

mde.maryland.gov/programs/Land/RecyclingandOperationsprogram/Pages/EducationandOutreach.aspx.

MDE's Website

Information on Maryland's waste diversion (*i.e.*, recycling and source reduction) activities is on MDE's waste diversion webpage at mde.maryland.gov/recycling. The webpage includes information on: State and county recycling programs; source reduction; special projects (*e.g.*, electronics and mercury recycling, composting, and household hazardous waste, etc.); setting up recycling programs at work and school; All StAR recycling; educational resources; and links to other sites. New information is added as it becomes available. MDE's website also offers Maryland's citizens and businesses the opportunity to email MDE with questions or comments on recycling.

County Recycling and Solid Waste Managers Meetings

MDE organizes regular joint County Solid Waste and Recycling Managers meetings in Maryland throughout the year. These meetings offer managers the opportunity to network, share ideas, and gain insight to promote efficient solid waste management and recycling programs. MDE reports on the latest recycling activities, trends, and legislative and regulatory changes. Speakers from industry

and government are invited to educate local governments on issues including public outreach, new technologies, and initiatives such as composting. In an effort to keep these forums focused and relevant, county managers are periodically surveyed regarding the meeting format and their technical support needs.

Partnerships

MDE recognizes the value of being an active partner with local and regional groups that focus on waste management issues. The following is a description of MDE's partnerships.

The Association of State and Territorial Solid Waste Management Officials, Inc. (ASTSWMO) – ASTSWMO (astswmo.org) works to enhance and promote effective programs and affect policies for waste and materials management, environmentally sustainable practices, and environmental restoration.

Electronics Recycling Coordination Clearinghouse (ERCC) – ERCC (cycleclearinghouse.org) was launched in 2010 by two leading nonprofit organizations advancing recycling efforts across the country - the National Center for Electronics Recycling (NCER) and the Northeast Recycling Council (NERC). The ERCC is a forum for coordination and information exchange among the state/local agencies that are implementing electronics recycling laws and all impacted stakeholders.

Maryland Environmental Service (MES) – MES (menv.com) recognizes that recycling is an element of effective waste management. MES assists MDE-led All StAR program and local governments by offering program planning and implementation, facility management and operation, and marketing of recyclable materials. MES administers the Maryland Used Oil Recycling Program on behalf of MDE. Additional information is available at 800-4RECYCLE.

Maryland Recycling Network (MRN) – The MRN is a nonprofit, volunteer organization (marylandrecyclingnetwork.org) committed to promoting waste reduction, recycling, and the conservation of natural resources. MRN is dedicated to promoting partnerships and cooperation between the private and public sectors. MDE supports the mission of the MRN through staff participation, funding, and projects. MDE attends MRN meetings and reports MDE's activities and accomplishments to MRN Board members and attendees.

Northeast Maryland Waste Disposal Authority (NMWDA) – The NMWDA (nmwda.org) provides solid waste and biosolids management to its members – Anne Arundel, Baltimore, Carroll, Frederick, Harford, Howard, and Montgomery counties, and Baltimore City. NMWDA manages three waste-to-energy facilities and a facility that converts sewage sludge into compost.

Northeast Recycling Council (NERC) – The NERC (nerc.org) is a multi-state non-profit organization promoting sustainable materials management by focusing on waste prevention, toxics reduction, reuse, recycling and organics recovery.

County Waste Diversion Programs

County waste diversion programs are the key to the success of waste diversion in Maryland. MDE works cooperatively with each county to ensure that valuable market and program information is shared, analyzed, and discussed. Table 28 illustrates the elements of Maryland counties' individual recycling programs. Unless otherwise noted in Table 28, all counties collect "core" recyclables that include mixed paper (*i.e.*, all paper types, envelopes, books, cardboard, magazines, newspaper, and telephone books), containers (*i.e.*, glass, metal, and plastic), white goods (*i.e.*, appliances), and yard trimmings (*i.e.*, mixed yard waste and Christmas trees). Additionally, MDE's waste diversion webpage contains detailed information on the county recycling programs and source reduction activities. Highlights of county programs in 2021 include:

- * Two (2) counties (Cecil and Wicomico) achieved a recycling rate greater than the 55% recycling SMM goal.
- * Twelve (12) counties earned SR credits. Ten (10) counties - Anne Arundel, Baltimore City, Baltimore County, Carroll, Cecil, Frederick, Harford, Howard, Montgomery, and Prince George's earned the maximum 5% SR credit.
- * Three (3) counties accept food residuals for recycling.
- * Sixteen (16) counties accept expired medication for proper disposal.
- * Twenty-two (21) counties had permanent electronic drop-off locations.
- * Seventeen (17) counties operated textile collection programs.
- * Nineteen (19) counties maintained mercury thermometer drop-off locations.
- * Fifteen (15) counties collected paint for recycling.
- * Eighteen (18) counties operated HHW programs.

Waste diversion programs are constantly changing. Appendix G includes contact information for Maryland's recycling coordinators, who can provide the most current information about waste diversion in their counties. For additional information, please log onto MDE's waste diversion webpage at mde.maryland.gov/recycling and click on "State, County, and City Contact Info."

Table 28 – County Residential Recyclables by Commodity

County	Food Residuals	Medicine	Lead-Acid Batteries	Oil/Antifreeze	Established Electronic Drop-offs	Paints	Textiles	Hg°	HHW~	Comments/Additional Materials^
Allegany ^p		✓	✓	✓/✓	✓					batteries, tire, propane tanks, stretch wrap, and vinyl siding
Anne Arundel ^{cs}		✓	✓	✓/✓	✓	✓	✓		✓	cooking oil, wood pallets, tires, propane tanks, rubble, vinyl siding, scrap metal, oyster/clam shells, empty fuel containers; food scraps
Baltimore City ^{cs}	✓	✓	✓	✓✓	✓	✓		✓	✓	tires, oyster shells, rigid plastics, scrap metal, plastic bag take-back events, wood waste
Baltimore County ^{cs}		✓	✓	✓/✓	✓	✓		✓	✓	cooking oil, propane tanks, usable building material
Calvert		✓	✓	✓/✓	✓	✓	✓	✓	✓	cooking oil, printer cartridges, oil filters, tires, propane tanks, Freon units, oyster/clam shells, rigid plastic, scrap metal, rechargeable batteries
Caroline		✓	✓	✓/✓	✓	✓	✓	✓	✓	Mid-shore program, eCycling event, paint on HHW Day
Carroll ~		✓	✓	✓/✓	✓		✓	✓	✓	scrap metal, vinyl siding, cooking oil, usable building material, #6 Styrofoam
Cecil ^{cs}		✓	✓	✓/✓	✓	✓	✓	✓		Rechargeable batteries, oil filters, scrap metal, tires, fluorescent lamps,
Charles ^{cps}		✓	✓	✓/✓	✓	✓	✓	✓	✓	Cooking oil, household batteries, oil filters, propane tanks, and tires are accepted at recycling centers; fluorescent lights accepted only at HHW events; no latex paint
Dorchester			✓	✓/✓			✓	✓		No books
Frederick ^{cs}			✓	✓/✓	✓				✓	pesticide containers, scrap metal, tires, flexible foam, wood pallets
Garrett ^m				✓/✓	✓					#1 & 2 plastic only, inkjet & toner cartridges, oil filters
Harford ^{cps}		✓	✓	✓/✓	✓	✓	✓	✓	✓	scrap metal, ecycle, mattresses, agricultural plastics, tires, fluorescent lamps, gasoline, pesticide containers, oil filters, propane tanks, inkjet cartridges
Howard ^{cs}	✓	✓	✓	✓/✓	✓	✓	✓	✓	✓	propane tanks, scrap metal, reusable building materials, vegetable oil, polystyrene, mattresses, flags, bicycles, food scraps
Kent		✓	✓	✓/✓	✓	✓	✓	✓	✓	Mid-shore program, eCycling event, pesticide containers, boat shrink-wrap; auto tires, cooking oil, Freon units, scrap metal
Montgomery ^c			✓	✓/✓	✓	✓	✓	✓	✓	bicycles, cooking oil, scrap metal, oil filters, propane tanks, tires, reusable building materials, rubble recycling (concrete, asphalt, brick, block, stone, and soil), bulky rigid plastic
Prince George's ^{cs}	✓	✓	✓	✓/✓	✓	✓		✓	✓	Scrap metal, propane, and helium tanks, CFLs, cooking oil, batteries, bulky materials such as furniture, tires, rigid plastics, CFC's..
Queen Anne's		✓	✓	✓/✓	✓	✓	✓	✓	✓	Mid-shore program, eCycle event; boat shrink-wrap, passenger tires; gasoline collection and vegetable oil recycling
St. Mary's ^s		✓	✓	✓/✓	✓	✓	✓		✓	oil filters, eyeglasses, cooking oil, rechargeable batteries, propane tanks, tires, scrap metal, oyster shells
Somerset ^s			✓	✓/✓				✓		pesticide containers, oil filters, tires
Talbot		✓	✓	✓/✓	✓	✓	✓	✓	✓	Mid-shore program, eCycling event, pesticide containers
Washington			✓	✓/✓	✓		✓	✓		eCycle event; propane tanks, cooking oil, tires, polystyrene, rechargeable batteries
Wicomico ^c			✓	✓/✓			✓	✓	✓	Oyster/clam shell, scrap metal, tires, wood pallets, propane tanks, Freon units
Worcester			✓	✓/	✓		✓	✓	✓	propane tanks, tires, wood pallets, scrap metal

^c Curbside recycling collection (in Wicomico Co., only in Salisbury); ^p Pay-As-You-Throw Program (in Harford Co., only in Aberdeen); ^s Single-stream Recycling (in Calvert Co. only some individual towns offer single-stream); [°] Have established Mercury Thermometer Drop-offs; ~ Household Hazardous Waste Collection Day. Contact the County for details including materials accepted. ^ In this section, eCycle = electronics recycling

Economic Benefits of Permitted Solid Waste Acceptance Facilities

This table provides information that was voluntarily reported by permitted solid waste acceptance facilities in 15 political counties describing the economic benefits of the facilities to the host communities. While the economic benefits identified in the table are significant, the information does not fully represent the total economic benefits to Maryland’s communities that are provided by all permitted solid waste acceptance facilities. **The facilities that updated their information in CY22 are highlighted by (*)**.

Table A1 – Economic Benefits

Jurisdiction	Site Name	Economic Benefits to Community	Value of Facilities Provided	Direct Employment Benefits (Salaries/No. of Employees)	Other Economic Benefits
Allegany	Mountainview Sanitary Landfill (Privately Owned)	Provides County residents and businesses an environmentally safe disposal site for County solid wastes at reasonable rates. The facility has eliminated the need for Allegany Co. to fund and operate its own solid waste disposal facility.	Allegany County uses Mountainview Landfill as a collection site for recycling materials, including glass, cardboard, plastic, aluminum cans, newspaper, and magazines. The facility also provides an ash disposal area for citizen use during the winter months.	No information provided.	The Mountainview Landfill had purchases for supplies and materials from Allegany County businesses. Also has on-site used oil, cardboard, and aluminum recycling programs to boost recycling in Allegany County.
Allegany	Western Maryland Processing and Transfer Station (Privately Owned)	More jobs for the community and more taxes for the County. Alternative cost-effective waste collection option.	Reduced Carbon footprint due to less travel time to the County landfill.	3 full time and 3 contract positions	Increase of taxes paid to the County
Anne Arundel	Annapolis Junction Recycling and Transfer Station (Privately Owned)	Facility pays Host Community Fee to the County for each ton of solid waste received. Tip fee charged County is below the area’s rates for disposal.	Highway traffic from tractor trailer trucks is reduced due to rail transfer of solid waste. Allows Anne Arundel and Howard Counties to conserve disposal capacity in county landfills.	24 employees.	No information provided.

Baltimore City	BFI Baltimore Processing and Transfer Center (Privately Owned)	Paid local taxes.	Convenient location for C&D haulers to offload.	5 employees.	No information provided.
Baltimore City	Wheelabrator Baltimore LP. (Privately Owned)	Extends life of landfills by reducing MSW volume through incineration.	Sponsors several community outreach and partnership programs.	68 employees including professionals and skilled workers.	No information provided.
Baltimore City	L & J Processing Facility (Privately Owned)	The facility is located in a rehabilitated location and generates revenue through its solid waste recycling by turning waste into valuables. Also, the facility adds to the local economy through personal and business tax revenue annually.	The Facility diverted 28,744 tons of its waste accepted at the site for recycling and saves costs of disposal.	\$475,000/22 employees.	The business intends to expand in future and continue to provide solid waste and recycling services for the community.
Baltimore City	Daniels Sharpsmart Inc. (Privately Owned)	Local employment, rent and other direct local purchases to support business.	Not provided.	14 employees. Salary and benefit valued at \$500,000.	Goods & services purchased locally for \$393,000. Other operational costs of \$5,363.
Baltimore City	Baltimore Recycling Center, LLC (Privately Owned)	The facility pays more than \$65,600 in taxes per year.	The business has invested over five million dollars in the property and equipment to run a C&D recycling facility at no cost to the City. Baltimore City gets recycling credit for these efforts and property builders get LEED credits for our recycling of their waste.	90 employees.	Purchased local goods and services for \$2 million. Fuel for \$550,000. Paid \$20,000 for Tags and permits. Revenues of recycled material is more than \$1 million.
Baltimore City	Northwest Transfer Station (Publicly Owned)	Not Provided	Provides curbside collection of mixed refuse and recycling services.	17 employees.	Not Provided
Baltimore City	Hawkins Point Plant Landfill (Privately Owned)*	Reduced tipping cost for non-friable asbestos containing materials for the Baltimore/Washington market.		1 employees /\$62,400	Sold clay and topsoil to the local market for SWM needs. Clay and topsoil sales varies per load from \$10-

					\$100 and \$100 respectively.
Calvert	Howlin Land Clearing Debris Landfill (Privately Owned)	Tax incentive.	Assisting the county in disposing solid waste.	3 employees.	No information provided.
Calvert	Southern Maryland Processing Facility (Privately Owned)	Assisting the county in handling solid waste & promoting recycling.	Not provided.	4 employees.	\$10,000 annual purchase of goods and services, recycled products.
Calvert	Appeal Sanitary Landfill/Transfer Station (County Owned)*	The landfill is the sole County operated facility for the final disposition of County and out-of-county waste. The transfer station provides value to Calvert County by allowing the Division of Solid Waste to extend the useful life of the Appeal Municipal Landfill by at least 20 years, providing a tangible economic benefit.	Revenues are collected from users of the landfill via user fees and excise taxes. County residents may use the convenience centers free of charge, and for chargeable items, county residents pay a lower fee at the landfill than commercial haulers for disposal. The transfer station is complementary to the Appeal Municipal Landfill and is operated in conjunction with ongoing solid waste refuse collection, landfilling and recycling operations.	The landfill operations and convenience centers are supported by a group of 65 full time positions with over \$2.1 million in salaries.	The landfill capital and operational projects have utilized various contractors and vendors within Calvert County and surrounding counties.
Carroll	Northern Municipal Landfill*	Market competitive waste disposal and recycling rate. Free residential self-hauled recycling and yard waste drop off. Multiple free recycling options for residents including single stream, scrap metal	Resident drop-off recycling is accepted at no charge. Haulers pay \$55/ton. Free disposal and recycling to county volunteer fire companies and other organizations holding faires and	18.75 full time employees with approx. budget of \$1.6 million.	Local employment of drivers and employees of vendors serving Northern Landfill. Purchase of local goods for use at Northern Landfill.

		and white goods, yard waste, lead acid batteries, textiles, rigid plastics and vinyl siding, electronics, used oil and antifreeze, cooking oils, usable construction supplies, and books.	other events in the county.		
Carroll	Roll-Off Express, Inc. (Privately Owned)	\$54,000/year paid in real estate, personal property and sales taxes.	\$2.25 million investment for facilities.	\$275,000/17 employees including equipment operators, drivers, laborers.	\$375,000 annual purchase of goods and services.
Cecil	Cecil County Central Landfill (County Owned)*	The County landfill accepts municipal and commercial waste originating in Cecil County. The facility allows residents to bring in recyclables and MSW.	Provides waste disposal and recycling opportunities for Cecil County's population. The facility works in conjunction with two transfer stations owned by Cecil County Government to accept MSW originating within the County.	The landfill operations are supported by a total of 20 employees with approx. 1.69 million in compensation.	Estimated value of goods and services purchased from the locality for the facility: \$3.4 million. Estimated value of materials recycled for the year: \$273,000.
Cecil	Stemmers Run Transfer Station (County Owned)*	Residents drop MSW and single stream recyclables for no cost. Christmas trees are accepted seasonally.	Residents drop MSW and single stream recyclables for no cost. Christmas trees are accepted seasonally.	Total Salaries paid \$ 85,000/1	Estimated value of goods and services purchased from the locality for the facility: \$45,000. Estimated value of materials recycled for the year: \$3,100
Cecil	Woodlawn Transfer Station (County Owned)	Residents drop MSW and single stream recyclables for no cost. Christmas trees are accepted seasonally.	Residents drop MSW and single stream recyclables for no cost. Christmas trees are accepted seasonally.	\$200,000/3 Employees.	Estimated value of goods and services purchased from the locality for the facility: \$5,500. Estimated value of materials recycled for the year: \$7,000.
Frederick	Essroc Industrial Waste Landfill	Land Assessment taxes paid for the industrial complex	Not Applicable	No employee	None
Frederick	Reichs Ford/Site B Municipal Sanitary Landfill/Transfer	Free curbside recycling for 85,799 residents, a recycling drop-off center for remaining	Disposal of C&D and MSW.	Over \$3.9 Million/54 employees.	Spent over \$8.2 million on various recycling contracts and programs.

	Station (County Owned)*	households, HHW collection, free mulch, yard waste grinding & sampling and analysis of 29 off-site residential water wells adjoining landfill property.			
Harford	Harford Waste Disposal Center (Publicly Owned)*	Provide County residents with disposal and recycling services. In addition, the facility acquires goods and services from local vendors. Further, the facility employs external contractors for various routine and non-routine services.	The facility is owned by the County and operated by Maryland Environmental Service. Provides County residents with nonprofit disposal methodology and hierarchy. Provides recycling services at “no cost.”	\$2.16 Million/38 full-time employees.	Estimated value of savings to Harford County: Free Single Stream Recycling - \$45,629, Free recycling for additional materials – \$176,302, Free yard trim recycling – \$838,078.
Howard	AmeriWaste Processing and Transfer Station (Privately Owned)	Payment of real estate, personal property and sales taxes to Howard County.	Facility supplements County facilities for solid waste disposal.	12 employees. Jobs include 53 equipment operators, 2 clerks, and 5 laborers.	\$200,000 in purchase from local vendors, \$19,000 in value of recycled items.
Montgomery	Montgomery County Solid Waste Processing & Transfer Station (Publicly Owned)	Strategically located for easy access to accommodate residential, industrial, and commercial use.	No information provided.	20 full time County employees. Covanta Montgomery, Inc. - 70 full time, 10 temps, MES - 13 full time 10 Temp employees, Clean Harbor – 4 full time employees.	Revenue from some materials partially offsets operating costs, allowing fees to remain relatively flat over the past several years.
Prince George’s	Recycle One Processing & Transfer Station*	Paid \$70,000 taxes to the County. Only facility in the County that provides MSW and C&D waste collection, recycling, and disposal services.	Strategically located for local customers.	Employs 20 individuals and 30 full-time trucking contracts for an estimated budget of \$6.5 million.	Goods and services purchased is approximately \$1.12 million. Invested 1.71 million in capital equipment and improvements.

St. Mary's	St. Andrew's Municipal Landfill (Publicly Owned)	Tipping fees waived during emergency/storm damage situations and other approved non-profit organization projects. Provides mulch made from yard and wood waste free to county residents.	Processes county's residential yard waste into mulch. Provides location for disposal of appliances and up to five (5) tires per trip, free of charge. Future expansion of area C (36.8 acres) permitted landfill, if required.	\$700,000/21 employees include a manager, 4 equipment operators, 2 scale house operators, and 14 attendants (full & part time).	\$300,000 - County subsidy of Recycling. \$1.3 million - County subsidy for residential solid waste disposal.
Washington	Forty West Municipal Landfill (Publicly Owned)	Centrally located in County for easy access to accommodate residential, industrial, and commercial use.	Facility owned and operated by Washington County for the solid waste disposal needs of County residents.	\$2,000,930/29 employees. Jobs include: deputy director (1), assistant director (1), recycling coordinator (1), office staff (2), weigh clerk full time (3) and part time (5), equipment operators (6), mechanics (2), residential drop-off attendants (4), part time drop off attendants (2), inmate crew guards (2),	Approx. \$6.3 million annual operating budget spent locally for the purchase of materials, services, equipment, and wages.
Wicomico	Bennett Construction Inc. (Privately Owned)	Creates a larger tax base to the local community and the only waste collection facility in the area. Provides employment opportunities in the area.	Expanding the value of the facility in the County for other opportunities.	\$ 328,000/15 employees.	Fuel and Maintenance Cost to the local economy - \$238,000/year. Offers lower tipping fees to the customers.
Worcester	Ocean City Transfer Station (Publicly Owned)	Provides for the consolidation of solid waste collected in the Town of Ocean City for transport 26 miles to the County's MSWLF.	No information provided.	No information provided.	No information provided.

Permitted Landfills Capacity

Each landfill in Maryland is required to report the cubic yards (CYs) of available disposal capacity and the life expectancy of the facility at the current disposal rate. Using the average compaction factor, based upon historical data, this remaining capacity is converted to tons.

MSW landfills (Table C1) reported a total available capacity of 49,222,941 tons with 2,283,852 tons being disposed of in CY22. Thus, at the current disposal rate, there would be over 21 years (49,222,941 tons ÷ 2,283,852 tons) of available MSW landfill capacity in Maryland. However, this calculation does not account for population changes, changes in waste generation or disposal rates, or the closing of older MSW disposal facilities. Nor does it include facilities for which permits may have been issued, but which have not yet been built and are not accepting waste.

* Dorchester County Municipal Landfill is under construction.

** Montgomery County Site 2 Landfill's construction is on hold until the county needs landfill space in the future.

*** St. Andrews Municipal Landfill closed in 2001. The current permit (2020-WMF-0138) was issued for a new landfill that was never constructed. St. Mary's County uses permit 2020-WMF-0138 to operate the closed St. Andrews Municipal Landfill as a transfer station.

^ Equal to Landfilled in 2022 (CY) ÷ Permitted Capacity (CY)

Construction and Demolition Debris landfills (Table C2) reported a total available capacity of 9,315,496 tons with 860,116 tons disposed of in CY22. At the current disposal rate, there would be approx. 11 years (9,315,496 tons ÷ 860,116 tons) of available C&D landfill capacity in Maryland.

Why is it Important to Reduce the Amount of Food Waste?

In 2021, approximately 1,063,000 tons of food waste was recycled at organic recycling facilities such as composters, mulchers and anaerobic digesters. It takes a lot of money, water, and energy to produce our nation's food supply, and by disposing of wasted food into landfills and incinerators, all that money, water and energy is lost. Decomposition of food waste in a landfill leads to the generation of greenhouse gases, such as methane. Methane is one of the chief gases contributing to climate change. In addition, food waste takes up a large amount of space in a landfill, resulting in the filling and closing of landfills at a faster pace.

Much of the food that is discarded into the waste stream is perfectly fine and edible. This food would best be used to help feed people in need through donations to food rescue organizations or community groups. Excess edible food may also be used for animal feed on farms or in pet food. Other food waste can be sent to an organics recycling facility for composting or anaerobic digestion.

During the 2021 legislative session [HB264](#), was passed. The bill requires certain food waste generators that produce 2 tons of food residuals a week and within 30 miles of a composting facility to either reduce, divert to food rescue organizations, farms for animal feed operations, or compost or anaerobically digest the residuals.

MDE has also developed a [mapping tool](#) to assist food generators in locating permitted food waste organic recycling facilities around the state.

For more information contact Shannon McDonald or Tim Kerr, shannon.mcdonald@maryland.gov, timothy.kerr2@maryland.gov

Eleven State Agencies Reach 30 Percent Recycling Rate in 2021

State government, as a whole, is required to recycle 30 percent of its waste. In 2021, eleven State agencies recycled at least 30 percent of their waste and eight agencies recycled more than 40 percent. State government, as a whole, recycled 27.1 percent of the waste it generated.

The following State agencies reached a recycling rate of at least 30 percent in 2020:

- Comptroller of Maryland;
- Dept. Of Environment;
- Dept. of Transportation;
- Dept. of Veterans Affairs;
- Maryland Environmental Service;
- Maryland Public Broadcasting Commission;
- Maryland School for the Deaf;
- Maryland State Archives;
- Maryland State Police;
- Subsequent Injury Fund;
- University System of Maryland.

Results for all State Agencies are available on the Maryland State Agencies 2021 Recycling Rates Table.

Department of Commerce

ABOUT THE MARYLAND DEPARTMENT OF COMMERCE

As the state's primary economic development agency, the Maryland Department of Commerce stimulates private investment and creates jobs by attracting new businesses, encouraging the expansion and retention of existing companies, and providing workforce training and financial assistance to Maryland companies. The Department also promotes the state's many economic advantages and markets local products and services at home and abroad to spur economic development and international investment, trade, and tourism. Between 2010 and 2016, Maryland Commerce has assisted nearly 4,000 small businesses and organizations; helped create or retain 40,000 jobs and leveraged nearly \$3 billion in private investment.

MARYLAND COMMERCE'S FINANCING & INCENTIVE RESOURCES

The Maryland Department of Commerce Office of Finance Programs provides the business community with financing and incentive-based solutions for economic development projects to maximize job creation and retention, leverage capital investment, and encourage growth in targeted business sectors and specific geographic areas throughout the state. To remain competitive in the marketplace, Commerce responds quickly to changing requirements with the development of incentives that address the identifiable needs of the business community.

Financial Incentives Provide:

- Entrepreneurs with access to capital markets
- Funding of economic development efforts for local jurisdictions
- Impetus to encourage capital investments and job creation
- Employment opportunities by attracting, creating, expanding, and retaining businesses

Note that Commerce, except in specific instances, only supports for-profit businesses operating within the State. Its programs are not generally intended to support non-profit or governmental activities, though there are exceptions. These exceptions are noted in the individual program descriptions below.

GEOGRAPHIC PROGRAM RESTRICTIONS

Most Commerce programs are restricted to providing assistance to businesses located within Priority Funding Areas (PFAs), as defined by State statute, the Maryland Department of Planning, and the State's 24 jurisdictions. The following areas qualify as Priority Funding Areas:

- Every Maryland municipality, as they existed in 1997;
- Areas in Maryland that are inside the Washington Beltway and the Baltimore Beltway;
- Areas that have been designated as Enterprise Zones, neighborhood revitalization areas, Heritage Areas, and existing industrial land;
- Other designated areas nominated by counties that meet certain guidelines.

Depending upon the program, many business operations located outside of a PFA may not be eligible for assistance through Commerce. Businesses should check with other State or Federal agencies to see if assistance is available through their programs. In addition, there are certain programs that are tied to geographic areas, and only businesses located within those areas are

eligible to obtain assistance from them. Examples are the Maryland Enterprise Zone Program and the Regional Institution Strategic Enterprise (RISE) Zone Program.

BUSINESS ACTIVITY PROGRAM RESTRICTIONS

Most Commerce programs are restricted to providing assistance to businesses operating in certain industries or engaged in certain activities. Some programs are highly restrictive, while others have broader application. Examples of program restrictions are:

- Line of business or NAICS code
- Business activity, such as research and development
- Workforce training
- Hiring new employees
- Capital investment in buildings or equipment

Some programs have few restrictions other than the creation of a minimum number of jobs, while others are highly targeted to certain industries or activities.

SMALL BUSINESS ASSISTANCE

The Maryland Department of Commerce offers multiple programs that support small business creation and growth.

Maryland Small Business Development Financing Authority (MSBDFa) Economic Development Article §§5-501 to 5-575

The Maryland Small Business Development Financing Authority (MSBDFa) was created by the General Assembly in 1978. This program promotes the viability and expansion of businesses owned by economically and socially disadvantaged entrepreneurs. MSBDFa assists small businesses unable to obtain adequate business financing on reasonable terms through normal financing channels. Meridian Management Group, a private contractor, manages the program's four components and Commerce provides financing and loan servicing for the approved small businesses. The four components are:

- Contract Financing Program – Provides loan guarantees and direct working capital and equipment loans to socially or economically disadvantaged businesses awarded contracts mainly funded by government agencies and/or public utilities.
- Equity Participation Investment Program – Provides direct loans, equity investments, and loan guarantees to small businesses.
- Long-Term Guaranty Program – Provides loan guarantees and interest rate subsidies.
- Surety Bonding Program – Assists small businesses in obtaining bonding primarily for government or public utilities contracts that require bid, performance, and payment bonds.

Geographic Restrictions: The MSBDFa program is restricted to businesses that operate within Priority Funding Areas.

Business Activity Restrictions: The MSBDFa program has no activity restrictions other than proof that a business is owned by economically and socially disadvantaged entrepreneurs.

Relevance to Study: Any business engaged in any activities related to recycling, recycled materials or recycled products is eligible for this program if they meet the geographic and business activity restrictions.

Small, Minority and Women-Owned Business Account—Video Lottery Terminal Fund (VLT)

Economic Development Article §5–1501; State Government Article §9-1A-27

Article XIX of the Maryland Constitution authorized video lottery terminals (VLTs) to contribute towards funding education. This provision was enacted pursuant to Chapter 5, Acts of the 2007 Special Session, and ratified by Maryland voters in the November 2008 General Election. As a result, Chapter 4, Acts of the 2007 Special Session also became effective and established the Small, Minority, and Women-Owned Businesses Account (the Account) under the Authority of the Board of Public Works (BPW). This law requires that 1.5 percent of VLT proceeds be paid into the Account to be used to make grants to eligible fund managers to provide investment capital and loans to small, minority, and women-owned businesses in the State. In 2017, the authority to operate the Fund was transferred to the Department of Commerce.

The State's VLT fund uses proceeds from Maryland's casinos to assist small, minority, and women-owned businesses located in targeted areas surrounding six Maryland casinos: Maryland Live in Anne Arundel County, Hollywood Casino Perryville in Cecil County, Rocky Gap in Allegany County, Ocean Downs in Worcester County, MGM National Harbor in Prince George's County, and Horseshoe Casino in Baltimore City. At least 50% of the VLT allocations support small, minority and women-owned businesses located within a 10-mile radius of the casinos. The other 50% is available to small, minority and women-owned businesses located throughout Maryland.

In FY 2020, there were nine designated fund managers that received funds for the purpose of making loans to small, minority, and women-owned businesses in the State:

- Anne Arundel Economic Development Corporation (AAEDC)
- Baltimore County Department of Economic and Workforce Development
- Baltimore Development Corporation (BDC)
- FSC First Prince George's
- Howard County Economic Development Authority (HCEDA)
- Maryland Capital Enterprises Inc. (MCE)
- Meridian Management Group, Inc. (MMG)
- Montgomery County Economic Development Corporation (MCEDC)
- Tri County Council for Western Maryland

Geographic Restrictions: The VLT program prioritizes businesses located within a 10-mile radius of one of Maryland's casinos but offers funding to businesses throughout the State.

Business Activity Restrictions: The VLT program has no activity restrictions other than proof that a business is a small, minority, or women-owned business.

Relevance to Study: Any business engaged in any activities related to recycling, recycled materials or recycled products is eligible for this program if they meet the geographic and business activity restrictions.

Military Personnel and Veteran-Owned Small Business No-Interest Loan Program (MPVSBLP)

Economic Development Article §§5-1001 to 5-1007

The Military Personnel and Veteran-Owned Small Business No-Interest Loan Program (MPVSBLP) was enacted originally in 2006 to assist with costs that result from the call to active duty for businesses owned by military reservists and National Guard members and for small businesses that employ such persons. In the 2013 legislative session, the Maryland General Assembly approved Chapter 105, which altered the name and expanded eligibility for participation in the program to include all veteran-owned small businesses. The change eliminated the requirement for a veteran to have a service-related disability to use the program.

MPVSBLP provides no-interest loans of up to \$50,000, from one to eight years, for businesses owned by military reservists, veterans, National Guard personnel and for small businesses that employ or are owned by such persons.

Geographic Restrictions: The MPVSBLP program restricts funding to businesses that operate within

Priority Funding Areas.

Business Activity Restrictions: The MPVSBLP program has no activity restrictions other than proof that the loan is going to a small business owned by military reservists, veterans, National Guard personnel, or is a small business that employs or is owned by such persons.

Relevance to Study: Any business engaged in any activities related to recycling, recycled materials or recycled products is eligible for this program if they meet the geographic and business activity restrictions.

Maryland Economic Adjustment Fund (MEAF)

Economic Development Article §§5-201 to 5-209

The Maryland Economic Adjustment Fund (MEAF) was established in 1994 as a non-lapsing revolving fund. The U.S. Economic Development Administration (EDA) and the State of Maryland provided funds to capitalize the program.

The goal of the program is to enable small businesses to upgrade or modernize operations, develop, or expand commercial applications for technology or enter and compete in new or different markets. The program provides financing assistance to small and underserved businesses that are unable to qualify for loans from traditional lending sources. Eligible businesses include manufacturers, wholesalers, retail, service companies, technology firms, and skilled trades.

Geographic Restrictions: The MEAF program restricts funding to businesses that operate within Priority Funding Areas.

Business Activity Restrictions: The MEAF program is restricted to companies involved in manufacturing, wholesale, certain services, and skilled trades. Funds can only be used for working capital machinery and equipment, building renovations, real estate acquisitions, or site improvements.

Relevance to Study: Any business engaged in any activities related to recycling, recycled materials or recycled products is eligible for this program if they meet the geographic and business activity restrictions.

ECONOMIC DEVELOPMENT INCENTIVES

Maryland Economic Development Assistance Authority and Fund (MEDAAF) Economic Development Article §§5-301 to 5-349

The Maryland Economic Development Assistance Authority and Fund (MEDAAF) is the primary economic development finance tool offered by the Department. MEDAAF was enacted in 1999 to provide below market, fixed-rate financing to growth industry sector businesses locating or expanding in priority funding areas of the State. The MEDAAF program is administered under five capabilities that address appropriate economic development opportunities for both the business community and political jurisdictions as follows:

- MEDAAF Capability 1 - Significant Strategic Economic Development Opportunities
- MEDAAF Capability 2 - Local Economic Development Opportunities
- MEDAAF Capability 3 - Direct Assistance to Local Jurisdictions or MEDCO
- MEDAAF Capability 4 - Regional or Local Revolving Loan Funds
- MEDAAF Capability 5 - Special Purpose Grants and Loans/Brownfields

The primary job creation capabilities are MEDAAF-1 and 2. MEDAAF-3 provides direct assistance to local jurisdictions for economic development projects and MEDAAF-4 provides funding to local governments to create revolving loan funds to assist small businesses. MEDAAF-5 has several special purposes including day care facility finance, Arts and Entertainment Districts, and brownfield remediation.

MEDAAF Capability 1 - Significant Strategic Economic Development Opportunities Projects under this capability are normally regarded as producing significant economic development opportunities on a Statewide or regional level. Assistance is provided directly to businesses or through the Maryland Economic Development Corporation (MEDCO) in the form of a loan. The maximum assistance under this capability cannot exceed the lesser of \$10,000,000 or 20 percent of the current fund balance.

MEDAAF Capability 2 - Local Economic Development Opportunities

Capability 2 of MEDAAF provides assistance in the form of a loan, a conditional loan, investment, or a grant directly to a business or to MEDCO for use in the project. All assistance under this capability must be endorsed through a formal resolution by the governing body of the jurisdiction in which the project is located. In addition, the local jurisdiction must participate in an amount

equal to at least 10 percent of the total assistance. Funds may be used for land acquisition, infrastructure improvements, buildings, fixed assets, and leasehold improvements.

MEDAAF Capability 3 - Direct Assistance to Local Jurisdictions or MEDCO

Capability 3 of MEDAAF provides assistance directly to a local jurisdiction or MEDCO for local economic development needs including feasibility studies, economic development strategic plans, and infrastructure. Funds may be used for buildings, infrastructure improvements, fixed assets, and leasehold improvements. All assistance under this capability must be endorsed through a formal resolution by the governing body of the jurisdiction in which the project is located. Assistance provided may be in the form of a loan, a conditional loan, investment, or a grant.

MEDAAF Capability 4 - Regional or Local Revolving Loan Funds

Capability 4 of MEDAAF provides assistance to local jurisdictions to help capitalize local economic development revolving loan funds. The typical revolving loan fund client is a small business that may be in an industry sector, such as retail service, that is not otherwise eligible for assistance. The final recipient of financing is determined by the local jurisdiction. Jurisdictions may receive funding of up to \$250,000 annually. To qualify for funding, local jurisdictions must provide acceptable matching funds into the designated revolving loan fund.

MEDAAF Capability 5 - Special Purpose Grants and Loans

This capability contains targeted programs for specialty initiatives that at one time had been deemed critical to the State's economic health and development by the General Assembly. These specialty programs may be exempt from local participation and certain other MEDAAF requirements. The special purpose initiatives include Brownfields, Seafood and Aquaculture, Animal Waste, Day Care, and Arts and Entertainment. The funds do not have a direct job creation component.

Geographic Restrictions: The MEDAAF program restricts funding to businesses that operate within Priority Funding Areas.

Business Activity Restrictions: The MEDAAF program has multiple components and is very complex. Businesses can receive direct assistance, local governments can receive funding for their revolving loan funds, jurisdictions can receive direct funding for certain activities, and special programs can receive assistance.

Relevance to Study:

- Any business engaged in any activities related to recycling, recycled materials or recycled products is eligible for this program as long as they meet the geographic and business activity restrictions.
- Any jurisdiction can apply for assistance with land acquisition, infrastructure improvements, acquisition of fixed assets, leasehold improvements, up to 70% of the cost of a feasibility study and up to 50% of the cost of preparing a local economic development strategic plan. Any of these activities may be related to recycling, recycled materials or recycled products or infrastructure creation or expansion.
- Revolving loan funds may be used to support business engaged in the activities under study, depending on the rules of each fund.

**Economic Development Opportunities Program Fund (Sunny Day)
State Finance and Procurement Article §7-314**

The Economic Development Opportunities Program Fund, known as Sunny Day, was enacted in 1988 to enable Maryland to act on extraordinary economic development proposals that required financial assistance beyond the capabilities of other state and local financing programs. The Sunny Day fund supports extraordinary economic development opportunities that create and retain employment as well as create significant capital investments. Projects must generate significant jobs in areas of high unemployment; they are evaluated on a competitive basis. Participants must provide a minimum capital investment of at least five times the amount of the Sunny Day assistance.

Geographic Restrictions: The Sunny Day program restricts funding to businesses that have investments within areas of high unemployment. In addition, these investments are expected to occur within Priority Funding Areas.

Business Activity Restrictions: The Sunny Day program is restricted to companies that are creating “extraordinary” economic development opportunities and “significant” capital investments.

Relevance to Study: Any business engaged in any activities related to recycling, recycled materials or recycled products or infrastructure creation or expansion is eligible for this program. if they are considered an extraordinary economic development opportunity and meet the geographic and business activity restrictions.

**Partnership for Workforce Quality (PWQ)
Economic Development Article §§3-401 to 3-412**

The Partnership for Workforce Quality (PWQ) is an incumbent worker training program established by the Maryland General Assembly in 1989 and administered by the Maryland Department of Commerce. PWQ was developed to encourage Maryland companies, especially manufacturing and technology companies, to invest in incumbent worker training for job-specific skills to upgrade or retain full-time, Maryland-based employees.

PWQ provides matching training grants and support services targeted to improve the competitive position of small and mid-sized manufacturing and technology companies. Grants are used to increase the skills of existing workers for new technologies and production processes, improve employee productivity, and increase employment stability. Matching grant funds are used to reimburse up to 50% of the costs of qualified projects.

Applicants must be a Maryland employer, may not be in arrears with any State taxing agency, and not be in default with any Commerce program. Applicants should have a minimum of 10 full-time employees. At least 60% of available funds must be awarded to employers with 150 or fewer employees in the State. The Program encourages the participation of small and minority-owned businesses. Priority will be given to manufacturing and technology companies. In areas of the State where regionally important industries have been identified beyond manufacturing and technology, justification should be provided to approve PWQ funding.

Geographic Restrictions: The PWQ program restricts funding to businesses located within Priority Funding Areas.

Business Activity Restrictions: The PWQ program is restricted to companies that wish to offer incumbent and new employee training and have at least 10 full-time employees. Preference is given to manufacturing and technology companies.

Relevance to Study: Any business engaged in manufacturing or technology-related activities related to recycling, recycled materials or recycled products or infrastructure creation or expansion may be eligible for this program. In addition, “regionally important industries” other than manufacturing or technology firms, may also be eligible.

CREDIT ENHANCEMENTS

Maryland Industrial Development Financing Authority (MIDFA) Economic Development Article §§5-401 to 5-466

The Maryland Industrial Development Financing Authority (MIDFA) was established by the Maryland General Assembly in 1965 to promote significant economic development by providing financing support to manufacturing, industrial, and technology businesses located in or moving to Maryland. MIDFA encourages private sector investments using insurance, the issuance of tax-exempt and taxable revenue bonds and linked deposits, which reduces a lender’s risk and increases access to capital for small and mid-sized companies. The Program has increased its commitment to growth and development of small business by increasing outreach efforts to community banks. The Fund does not provide direct loans but provides insurance to transactions resulting in reduced credit risks, and enabling better terms from private financial institutions.

MIDFA offers two types of support: Credit insurance and private activity revenue bonds.

Credit Insurance

- Bond Program: Insures bonds up to 100% not to exceed \$7.5 million of taxable or tax-exempt bonds.
- Conventional Program: Insures up to 80% not to exceed \$2.5 million of a transaction made by a financial institution. Export transactions may be insured up to 90%.
- Private Activity Revenue Bonds
- Taxable Bond: Provides access to long-term capital markets primarily for fixed asset financing.
- Tax-Exempt Bond: Provides access to long-term capital markets for fixed asset financing at tax-exempt rates. Eligibility is limited by Federal tax law to 501(c)(3) non-profit organizations,
- manufacturing facilities and certain solid waste projects. Additional limitations apply to the specific transaction type.

Geographic Restrictions: The MIDFA program restricts funding to businesses that operate within Priority Funding Areas.

Business Activity Restrictions: The MIDFA program is restricted to providing financing support to manufacturing, industrial, and technology businesses located in or moving to Maryland. The Fund

does not provide direct loans but provides insurance to transactions resulting in reduced credit risks, and enabling better terms from private financial institutions.

Relevance to Study: Any business engaged in any manufacturing, industrial, or technology-related activities involving recycling, recycled materials or recycled products or the creation of infrastructure related to these activities AND who is seeking a loan from a private institution is eligible for this program if they meet the geographic and business activity restrictions.

TAX INCENTIVES

Brownfields Revitalization Incentive Program (BRIP) Tax Property Article §§9-229 and 14-902

A site that qualifies for this incentive program may also qualify for real property tax credits. The site must be located in a jurisdiction that participates in the BRIP and be owned by an inculpable person. For five years after cleanup, a site may qualify for a real property tax credit between 50% and 70% of the increased value of the site. (In an Enterprise Zone, the tax credit may last for up to 10 years). This credit, combined with other real property tax credits, may not exceed 100% of the tax on the increased value of the site.

Geographic Restrictions: The BRIP program restricts funding to brownfields sites that are located within jurisdictions that participate in the program.

Business Activity Restrictions: The BRIP program is restricted to property that is an eligible brownfields site that is owned by an inculpable person or a property where there is a release, discharge, or threatened release of oil so long as the property is not owned by the person responsible for the discharge.

Relevance to Study: Any business engaged in any activities related to recycling, recycled materials or recycled products or infrastructure creation or expansion that may wish to set up operations on an existing brownfields site may be eligible for this program as long as they meet the geographic and business activity restrictions.

Enterprise Zone Tax Credit Tax General Article §10-702 and Tax Property Article §9-103

Maryland's Enterprise Zone Tax Credit Program is a joint effort between the State and local governments to provide tax incentives to businesses and property owners located in some of the State's most economically distressed communities. The Program was created in 1982 with two enterprise zones (EZs) in two jurisdictions. As of December 2017, there are 36 EZs across the State, along with four Focus Areas in Baltimore City and Prince George's County. There are currently seven State-designated zones in Western Maryland, 15 on the Eastern Shore, seven in Southern and Suburban Maryland, and seven in Central Maryland.

The Enterprise Zone program provides real property and state income tax credits for businesses located in a Maryland enterprise zone. The real property tax credit is 80% of the incremental increase in property taxes over the first five years, decreasing 10% annually during the next five years. The income tax credit is a \$1,000 credit per new employee. For economically disadvantaged employees, the credit increases to \$6,000 per new employee over three years. Enhanced credits for both property and income tax credits are available in Enterprise Zone Focus Areas.

Geographic Restrictions: The Enterprise Zone program restricts funding to businesses and property developers that operate within established enterprise zones.

Business Activity Restrictions: For a business to qualify for the Enterprise Zone property tax credit, it must meet all state and local eligibility requirements. To be qualified the business must satisfy one of the two specific statutory requirements, which are that the business must either (1) make an investment in capital improvements, or (2) hire new employees. The business must contact the local enterprise zone administrator regarding the local eligibility requirements because the local eligibility requirements vary by the enterprise zone.

Relevance to Study: Any business engaged in any activities related to recycling, recycled materials or recycled products or infrastructure creation or expansion is eligible for the Enterprise Zone program if they meet the geographic and business activity restrictions.

Job Creation Tax Credit (JCTC) Economic Development Article §§6-301 to 6-309

The Job Creation Tax Credit (JCTC) was enacted in 1996 to encourage businesses to create new jobs in Maryland. The credit is available Statewide, but lower job thresholds and increased credits are available in targeted areas. The credits are available for full-time jobs paying at least 150 percent of federal minimum wage in targeted industry sectors. The JCTC is available anywhere in the State in a variety of targeted industry sectors.

Businesses that create a minimum number of new full-time positions may be entitled to state income tax credits of up to \$3,000 per job or up to \$5,000 per job in a “revitalization area.” Businesses engaged in an eligible activity must create at least 60 new full-time jobs in a 24-month period; this is reduced to 25 new full-time jobs if they are located in a Priority Funding Area. In counties with (1) annual average employment less than 75,000 or (2) median household income less than two thirds of the statewide median household income, the minimum requirement is reduced to 10 jobs. A business may not claim more than \$1 million in a credit year. The program is capped at \$4 million in tax credits in a calendar year. Credits are certified on a first-come, first-served basis based on when the Maryland Department of Commerce (Commerce) receives the final application and the availability of credits. Unused credits may be carried forward for five years.

A business may qualify for the JCTC program if it is primarily engaged in:

- manufacturing or mining;
- transportation or communications;
- agriculture, forestry, or fishing;
- research, development, or testing;

- biotechnology;
- computer programming, information technology, or other computer-related services;
- central services for a business entity engaged in financial services, real estate services, or insurance services;
- the operation of central administrative offices;
- the operation of a company headquarters other than the headquarters of a professional sports organization;
- the operation of a public utility;
- warehousing;
- business services, if the business facility established or expanded is located in a state priority funding area

Geographic Restrictions: The JCTC program offers greater benefits to businesses that operate within Priority Funding Areas as defined in the JCTC statute. The JCTC PFA definition differs slightly from the definition used for other programs. Businesses located outside of a JCTC-defined PFA have higher job creation requirements.

Business Activity Restrictions: The JCTC program is restricted to companies involved in certain activities listed above, and creating a minimum number of jobs as required by the geographic area in which it is located.

Relevance to Study: Any business engaged in any activities related to recycling, recycled materials or recycled products or infrastructure creation or expansion is eligible for this program as long as they meet the geographic and business activity restrictions.

Innovation Investment Incentive Tax Credit Tax General Article §10-733

The Innovation Investment Incentive Tax Credit was adopted in 2021 to encourage private investment in Maryland-based early-stage technology companies. To qualify, the technology company must be organized for profit to engage in the research, development, or commercialization of innovative and proprietary technology. Eligible technology sectors currently include advanced manufacturing, aerospace, agriculture, artificial intelligence, blue technology, cybersecurity, education, energy, and sustainability, financial, life sciences, quantum and sensor and robotics. Qualified investments in technology companies may be eligible for a refundable State income tax credit equal to 33% of the investment amount not to exceed \$250,000 in tax credits, or 50% of the investment amount not to exceed \$500,000 in tax credits if the technology company is located in Allegany, Dorchester, Garrett and Somerset counties. Enhanced credit amounts are also available if the technology company is located in an Opportunity Zone or RISE Zone, subject to certain limitations. The minimum investment amount is \$25,000.

Geographic Restrictions: There are no geographic restrictions other than the requirement that the eligible R&D activities take place within the State of Maryland. Foreign or out-of-state investors may participate provided they meet the requirements of a qualified investor.

Business Activity Restrictions: The Innovation Investment Incentive Tax Credit is restricted to certain technology companies in eligible industry sectors.

Relevance to Study: Any business engaged in qualified activities related to recycling, recycled materials or recycled products or infrastructure creation or expansion is eligible for this program if they are located in Maryland and meet other programmatic requirements.

**More Jobs for Marylanders Incentive Program for Manufacturers (MJM)
Economic Development Article §§6-801 to 6-809**

The More Jobs for Marylanders (MJM) program was created in 2017 to promote the growth of manufacturing in Maryland by providing tax incentives for manufacturing job creation, encouraging manufacturers to invest in new equipment through accelerated and bonus depreciation, and funding job training and apprenticeship programs to help strengthen Maryland's manufacturing workforce. The program was expanded in 2019 to provide the income tax credit benefit to non-manufacturers, except for retailers and other prohibited activities, located in Opportunity Zones which are considered Tier 1 Areas. As of June 1, 2022, manufacturers and non-manufacturers in Tier 1 Areas are required to create and retain at least 10 new full-time positions and are eligible for a 10-year consecutive benefit period; while manufacturers and non-manufacturers in Tier 2 Areas are required to create and retain at least 20 new full-time positions and are eligible for a 5-year consecutive income tax credit. The income tax credit is equal to 4.75% of the annual wages paid to the full-time positions.

Tier 1 Areas include Opportunity Zones, Baltimore City and Allegany, Baltimore, Caroline, Dorchester, Garrett, Kent, Prince George's, Somerset, Washington, Wicomico and Worcester counties. Tier 2 Counties include all other Maryland counties.

Geographic Restrictions: The MJM program restricts funding to Maryland-based businesses.

Business Activity Restrictions: The MJM program is restricted to companies that are involved in manufacturing activities (NAICS 31-33), except for refiners as well as certain non-manufacturers in Opportunity Zones.

Relevance to Study: A business operating in areas related to recycling, recycled materials or recycled products or infrastructure creation or expansion is eligible for this program if they meet the geographic, business activity and job creation limitations.

**One Maryland Tax Credit
Economic Development Article §§6-401 to 6-407**

The One Maryland Tax Credit (OneMD) was enacted in 1999 to promote job creation and investment in qualified distressed communities, those counties with high unemployment, and low per capita income compared to the rest of Maryland. To qualify for the credits, the business must create at least 10 new jobs and expend at least \$500,000 in eligible project costs in a Tier 1 County. The jobs must be full-time, pay at least 120 percent of State minimum wage, and the business must be in a targeted industry sector. The tax credit is tiered based on the number of jobs created and capital expenditure:

- For businesses that create 10-24 qualified positions: maximum \$1 million in credits based on eligible project costs.
- For businesses that create 25-49 qualified positions: maximum \$2.5 million in credits based on eligible project costs.
- For businesses that create at least 50 qualified positions: maximum \$5 million in credits based on eligible project costs.

The credit can be carried forward 10 years and is refundable after the fourth credit year, subject to certain limitations. As of July 1, 2018, no business may claim both the One Maryland Tax Credit and Job Creation Tax Credit in the same tax year.

Geographic Restrictions: The One Maryland program restricts funding to businesses that operate within Priority Funding Areas located within Tier 1 Counties. As of January 1, 2022, these jurisdictions are Baltimore City and Allegany, Caroline, Dorchester, Garrett, Kent, Somerset, Washington, Wicomico, and Worcester counties.

Business Activity Restrictions: The One Maryland program is restricted to companies that conduct or operate a trade or business in Maryland or are an organization operating in Maryland that is exempt from taxation under §501(c)(3) or (4) of the Internal Revenue Code, and are expanding employment and investing at least the minimum amount of money required by statute.

Relevance to Study: Any business making a large investment in facilities and new employment in any activities related to recycling, recycled materials or recycled products or infrastructure creation or expansion is eligible for this program as long as they meet the geographic and business activity restrictions.

Research and Development Tax Credit Tax General Article §10-721

The Research and Development Tax Credit (R&D Tax Credit) was enacted in 2000 to encourage businesses to increase R&D expenditures in the State. The R&D tax credit is not a tax credit that specifically targets job creation although it likely supports the increase in R&D jobs in the State.

The R&D tax credit is 10% of eligible R&D expenses in excess of the Maryland Base Amount. The credits are capped at \$12 million each annually, with \$3.5 million reserved for small businesses. If the amount of credits all businesses apply for exceeds the cap, each business receives its pro rata share. The income tax credit is refundable for a small business if the tax credits exceed the income tax liability. Businesses must submit an application to the Maryland Department of Commerce by November 15 for expenses incurred in the previous tax year.

Geographic Restrictions: There are no geographic restrictions other than the requirement that the eligible R&D activities take place within the State of Maryland.

Business Activity Restrictions: The R&D Tax Credit program is restricted to companies involved in R&D activities, as defined by the Federal definition of qualified R&D and qualified R&D expenses. To qualify the business must incur Qualified Research and Development Expenses, as defined by § 41(b) of the Internal Revenue Code in Maryland.

Relevance to Study: Any business engaged in qualified Research and Development activities related to recycling, recycled materials or recycled products or infrastructure creation or expansion is eligible for this program as long as they are located in and perform their R&D within Maryland.

**Regional Institution Strategic Enterprise (RISE) Zone Program
Economic Development Article §§5-1401 to 5-1408**

A RISE Zone is a geographic area that has a strong connection with a qualified institution and is targeted for increased economic and community development. Qualified institutions include institutions of higher education, regional higher education centers, or non-profits affiliated with a federal agency. The purpose of the RISE Zone program is to access institutional assets that have a strong and demonstrated history of commitment to economic development and revitalization in the communities in which they are located. Qualified institutions and local governments develop a targeted strategy to use the institutional assets and financial incentives to attract businesses and create jobs within the zone.

A RISE Zone designation is in effect for 5 years, with a possible additional 5-year renewal. Counties and municipalities are limited to a maximum of three RISE Zones. Current RISE Zones are located in Baltimore City, Montgomery County, Prince George's and Wicomico counties. Businesses locating in a RISE Zone or an existing business doing a significant expansion within the Zone before January 1, 2023, may qualify for real property tax credits and income tax credits related to capital investment and job creation. In addition, each zone may create a rental assistance program for certain businesses that have nexus with the Qualified Institution within the RISE Zone. The local rental assistance program is funded by the administering local jurisdiction and the State.

The designation of a RISE Zone requires a two-step process. Institutions must first apply to Commerce to be designated a Qualified Institution. Qualified Institutions applying to Commerce to designate a RISE Zone shall jointly apply with a county, municipality, or the economic development agency of a county or municipality to designate a RISE Zone. Once designated, the RISE Zone may establish a rental assistance program and apply to Commerce for matching funds.

Geographic Restrictions: All eligible business activities must occur within an established RISE Zone.

Business Activity Restrictions: The RISE Zone program is restricted to companies who have business or research connections to qualified RISE Zone institutions.

Relevance to Study: Any business linked to a qualified RISE Zone institution and operating within a RISE Zone who is engaged in activities related to recycling, recycled materials or recycled products or infrastructure creation or expansion may be eligible for this program.

Department of General Services

Report on DGS Activities Related to HB 164 – Development of Recycled Content Markets

June 2022

Introduction

This report is submitted by the Maryland Department of General Services to the Maryland Department of the Environment to comply with the reporting mandate included in HB 164 which requires DGS, and other agencies, to support MDE in the development of recycling markets. Specifically, this report addresses the following requirement:

On or before July 1, 2022, the Commerce, DGS, MDOT, and MES shall report to the Office of Recycling in MDE on:

- Relevant programs, tools, training guides, campaigns, and technologies available for promoting the development of markets for recycled materials and recycled products in the state
- Including efforts in state government to increase the use, reuse, and remanufacturing of recycled materials and the use of recycled products

Maryland Green Purchasing Committee

The Maryland Department of General Service can have a significant impact on supporting demand for recycled content products, primarily through the Green Purchasing Committee. DGS chairs and staffs the Green Purchasing Committee (GPC) which is recognized nationally as a leader in sustainable procurement in the public sector.

Established in 2010 by the Green Maryland Act, the State's green purchasing program is administered by the Maryland Dept. of General Services with one and a half staff positions dedicated to carrying out the State's green purchasing initiatives. Unique to Maryland is the inter-agency "Green Purchasing Committee" (Chaired and staffed by DGS with 8 other statutory member agencies) that convenes ~8 times per year to develop tools, best practices, training programs, and approve environmentally preferable specifications for State agencies to adopt.

By statute, the GPC adopts and publishes specifications for environmentally preferable products and services that State agencies must then adopt. To learn more about the GPC, please visit: <https://dgs.maryland.gov/Pages/GreenPurchasing/index.aspx>

Relevant State Procurement Activities

The conservation of resources and the reduction of landfill waste have long been pillars of Maryland's [Green Purchasing Program](#), led by DGS. To meet these goals, Maryland's Green Purchasing Committee (GPC) has engaged in 4 strategic actions to ensure continued progress: 1) Data Collection and Analysis; 2) Training and Resource Development; 3) Vendor Engagement; and 4) Contract Integration. The outcomes of recent efforts are as follows:

Data Collection and Analysis

- Verified 1,860,992.39 lbs. of recycled content purchases in FY21.
- Used standardized data collection template with fields for material type and weight to capture recycled content benefits.

Training and Resource Development

- Developed a factsheet and held a webinar (120+ participants) on how to [Save Money by Buying Green](#) which emphasized the purchase of reusable and remanufactured products.
- [Held Office Supply Purchaser Training](#) on how to find green products on Statewide contracts – with an emphasis on recycled content products.
- Included recycled content requirements in 3 new GPC published specifications.
- Arranged training sessions for Maryland staff: *Driving Markets for Recycled Content* training by Lynn Rubenstein (NERC); *Buy Recycled in Maryland* training by Richard Keller (Baltimore County).

Vendor Engagement

- 7 vendor one-on-one sessions held (to date) with vendors to promote green products. Outcomes included the blocking of non-compliant products such as copy paper with less than 30% minimum post-consumer recycled content.
- Engaged a preferred provider in regular quarterly meetings to identify opportunities to increase recycled content percentages in targeted product categories.
- Developed purchasing guides that show the amount of recycled content in products offered on statewide contracts.

Contract Integration

- New contract for antifreeze required antifreeze to be reclaimed/remanufactured and adhere to the EPA CPG for Vehicular Products.
- New contract for food service ware included requirements that items be certified compostable or 100% recycled.
- Maryland participated in the development of a cooperative purchasing janitorial supplies contract (led by Massachusetts). This contract only offered green products and included minimum requirements for recycled content.

The GPC prioritizes a data driven approach for the development of its green purchasing program. The GPC engages targeted vendors on reporting to increase the amount of data collected on recycled content products - for instance, additional data points on material and weight were requested. Vendors are required to submit quarterly sales and environmental data to the GPC for the products and services procured by the State. This data is then verified by the GPC for accuracy and to limit occurrences of greenwashing. After data collection and analysis is complete for all vendors, the results are used to determine green purchasing benefits, successes, opportunities, and challenges; this in turn is used to inform the GPC's strategy for the upcoming years. The calculation of benefits is particularly important as it is a reliable tool to increase top-down support for green purchasing efforts.

The State of Maryland, through the GPC, is a Northeast Recycling Council (NERC) Government Recycling Demand Champion. As a Recycling Demand Champion, DGS has already pledged to Increase Public-Sector Demand for Recycled Content Products through our procurement activities. DGS reports data annually as part of this voluntary program.

Conclusion

The Maryland Green Purchasing Program is an established state-wide program addressing environmental impacts of the products and services procured by the State. There is opportunity to

leverage State procurement and purchasing power to drive markets for recycled content. It is recommended to coordinate with DGS and the Maryland GPC to ensure that any specifications and purchasing guidance reflect shared goals to drive markets for recycled content.

Maryland Department of Transportation

HB164 – MDOT Submission

Relevant programs, tools, training guides, campaigns, and technologies available for promoting the development of markets for recycled materials and recycled products in the State, including efforts in State government to increase the use, reuse, and remanufacturing of recycled materials and the use of recycled products.

MDOT - Introduction

The Maryland Department of Transportation (MDOT) is an organization comprised of five business units and one Authority. They are: The Secretary's Office, MDOT State Highway Administration, MDOT Maryland Transit Administration, MDOT Motor Vehicle Administration, MDOT Maryland Port Administration, MDOT Maryland Aviation Administration and the Maryland Transportation Authority. This unique approach provides the state's leadership with the ability to develop a coordinated and balanced approach to transportation.

Maryland Green Purchasing Committee

MDOT participates in many legislatively-established working groups, one being the Maryland Green Purchasing Committee. The Maryland Green Purchasing Committee (GPC) was established by the Green Maryland Act of 2010, to administer environmentally preferable purchasing program for the State. To do this, the GPC develops and executes statewide green purchasing policies, guidelines, programs, best practices, regulations, and trainings to raise general awareness for these issues. Work by the GPC also supports Maryland's established targets for greenhouse gas reductions and energy efficiency. The Maryland Department of Transportation has been a Statutory Member of the GPC since its inception; participating in quarterly meetings, subgroup meetings, purchasing specification development, and electric vehicle interagency workgroups. By leveraging green procurement tools developed in this Committee, MDOT is better able to increase the proportion of dollars spent on green purchases. The inclusion of the Maryland GPC is critical to meeting the goals outlined in HB164. In the May 2022 GPC quarterly meeting, the HB164 working group was discussed and the GPC Chair along with the group's statutory members agreed that their mission is in direct alignment with supporting the State procurement of recycled goods.

Procurement and Statewide Contracts

In Maryland, Statewide contracts are typically managed by the Department of General Services (DGS). This State Agency also develops green purchasing specifications for all State procurement. MDOT, in addition to all State agencies, must report annually, dollars spent on green purchases to the DGS.

State Agencies, Legislation and Working Groups

MDOT participates in external and internal committees and working groups that can help promote the market for recycled goods in Maryland. A non-exhaustive list of related committees in which MDOT participates:

- Maryland Green Purchasing Committee
- Maryland Green Building Council
- Maryland Commission on Climate Change
- Sustainable Materials Management Maryland (SM3)
- MDOT SHA's Recycled Material Task Force
- MDOT MPA's Innovative Reuse Committee
- MDOT MPA's Dredged Material Management Program (DMMP)
- Association of Climate Change Officers (ACCO)
- MDOT/MPA/MDE/MEA Air Agreement Working Group
- Project Green Classrooms

For MDOT information, please contact:

Eddie Lukemire

Office of Environment, MDOT's Secretary's Office

elukemire@mdot.maryland.gov

Maryland Environmental Service

MES is a non-budgeted instrumentality of the State that is wholly reliant on revenues generated from contractual agreements with clients (mostly State and local government entities). As such, the costs for any tasks that MES takes on that are non-revenue generating activities (including staff who are assigned to certain projects) are ultimately borne on clients in the form of higher prices for services. With that in mind, MES has not had much activity by way of marketing recycled products, and while we would be happy to contribute to this effort moving forward, a funding source would need to be identified.

MES's efforts on this issue.

Around the year 2011, MES published the 7th edition of the "Buy Recycled" Training Manual. MES also received a small grant of \$5,000 to assist with training for various counties and organizations. Please go to our website at <https://menv.com/procurement/> for further information.

Beyond this effort in 2011, since there has not been a funding source for marketing of recycled products, MES has not had much activity in this space. However, on behalf of our clients, we do quite a bit of market development and outreach. A few feature projects include:

- A \$6 million plastics processing upgrade completed at the Prince George's County Material Recovery Facility. This upgrade allows Prince George's County to separate plastics and send them directly to markets, improving recyclability and market values. This upgrade also included upgrades to the fiber screen that improved paper quality.
- MES has done a significant amount of work on market and vendor development for both recyclable commodities and compost products. On behalf of our clients, we have developed and expanded relationships with various vendors east of the Mississippi to move Maryland recyclables to market.
- We also do a variety of education and outreach programs at the request of our clients. These include facility tours, school visits, and other public programs. In particular, MES staff based in Harford County have a significant outreach program at the County elementary schools.
- MES staff have been asked to speak on recycling and recycling markets at various events to promote recycling and recycling markets.

APPENDIX G
