

TIDAL WETLAND CONSULTANT LIST

This list is for informational purposes only. It is not a complete list of all providers that may offer tidal wetland related professional services. It is available as a convenience to the public. The Department in no way recommends or guarantees the accuracy or quality of services performed by the providers listed.

Another list that may be helpful is the List of Registered Contractors, for those contractors who perform marine contractor services:

<http://www.mde.state.md.us/programs/Water/WetlandsandWaterways/Pages/RegisteredMarineContractors.aspx>

Marine contractor services means construction, demolition, installation, alteration, repair, or salvage activities located in, on, over, or under State or private tidal wetlands. These activities include (1) dredging and filling; (2) the construction, demolition, installation, alteration, repair, or salvage of structures, including boathouses, boat or other personal watercraft lifts or ramps, slips, docks, floating platforms, moorings, piers, pier access structures, pilings, wetland observation platforms, wetland walkways, and wharfs; and (3) the construction, demolition, installation, alteration, repair, or salvage of stabilization and erosion control measures, including revetments, breakwaters, bulkheads, groins, jetties, stone sills, marsh establishments, and beach nourishment or other similar projects.

Each provider listed is coded only for the wetland-related services they offer. The codes are assigned based on information furnished by the provider. If difficulties were encountered in determining what services were offered, then no code was assigned. Users of this list should always contact providers directly for a full and complete explanation of services offered. The codes are:

- A: Construction/Contractors**
- B: Environmental Assessment**
- C: Design and Engineering**
- D: Mapping**
- E: Mitigation**
- F: Regulatory and Permit Coordination**
- G: Survey**

Additions/revisions to the list will be processed upon receipt of a written request and appropriate documentation. Requests should include a summary description, in one page or less, of the wetland related services offered in the areas of: wetland delineations; functional analysis (e.g., WET and HEP); mitigation; and regulatory and permit coordination. Send request to:
