

August 1, 2023

Serena Coleman McIlwain
Secretary of the Environment
Maryland Department of the Environment
Montgomery Park Business Center
1800 Washington Blvd.
Baltimore, MD 21230

Dear Secretary McIlwain,

It's time for Maryland to stay strong on what is required to restore the Susquehanna River and protect the Chesapeake Bay and put conditions on Constellation's operation of Conowingo Dam that meet those requirements. Constellation did not maintain the reservoir which is now full of sediment and pollution that overflows into the Bay. Not only has the dam blocked access to hundreds of miles of the river and streams for migratory fish and disrupted the natural flow of the lower river, it is a major source of pollution to the Bay. When the next major storm hits the dam, the pollution released will be catastrophic. If Constellation wants to claim the dam is a clean source of energy, it's time for them to clean up their act and take action to protect the Chesapeake Bay and Susquehanna River - resources that belong to all of us.

The water quality certification issued by the state must include:

- Constellation must address the nutrient load attributed to the Dam's operations or pay a payment in lieu of nutrient reductions. Specifically, Nitrogen pollution must be reduced by 6 million lbs per year and Phosphorus pollution by 260,000 lbs. per year.
- Improvements to downstream flow to restore a more natural hydrology to the river system.
- Restoring lost ecosystem services such as the filtering of pollution by freshwater mussels in the Susquehanna River.
- Improving upstream American eel and fish passage to advance efforts to restore lost fisheries for American shad and river herring, species which were blocked for many decades from moving upstream to spawn. Specifically, Constellation must take actions to allow 5 million shad and 12 million herring to migrate over the dam each year.

- Improving the resiliency of the River to climate change, including SAV restoration, living shoreline construction and floodplain management; and,
- Managing trash and debris from the Susquehanna River watershed that accumulates behind Conowingo Dam during low flow periods and passes through during high flows, creating a nuisance for recreational boating and hazards for swimming – and is a direct violation of the Clean Water Act.

Constellation, a \$30 billion corporation, has been using a public resource for private gain for decades. It's time that Constellation pays its fair share for the cleanup at the dam and stops its delay tactics and threats of litigation. The Conowingo Dam Watershed Implementation Plan (CWIP) is based on science that identified an additional reduction of 6 million pounds of nitrogen and 0.26 million pounds of phosphorus is needed in order to mitigate the water quality impacts of Conowingo Reservoir infill. The cost of the measures necessary to meet these reduction goals should not be put on the backs of Maryland's taxpayers. Constellation can pay its fair share and still operate the dam at a profit – for the next 50 years.

Sincerely,

Robin Broder - Grantsville, MD 2023-07-12
